

Install & Using Redirect Plugin

This document assumes you know how to install a plugin. But just in case here is a quick overview:

Install Plugins

Search | **Upload** | Featured | Popular | Newest | Favorites

Install a plugin in .zip format
If you have a plugin in a .zip format, you may install it by uploading it here.

1 Choose File | No file chosen | Install Now **3**

2

1) Click "Choose File"
2) Navigate to plugin on hard drive and double click it.
3) Click "Install Now".
Depending on the speed of your host plugin will install within seconds.
Activate the plugin!

Open

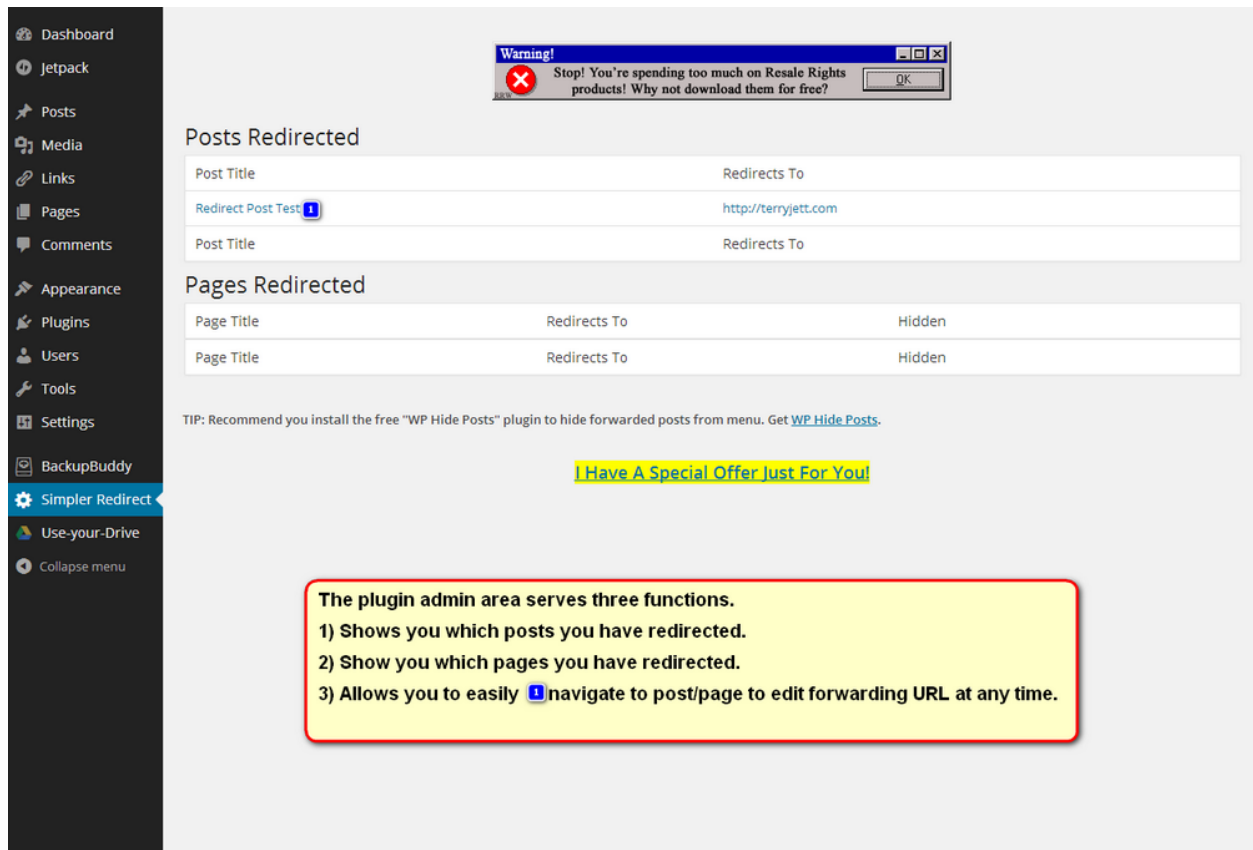

Computer > Toshiba (F:) > Projects - RRW > WP Redirect > Example

Organize > New Folder

Name	Date modified	Type	Size
Documents			
Music			
Pictures			
Videos			
Homegroup			
redirectplugin.zip	8/27/2014 6:34 AM	WinRAR ZIP archive	3.96 KB

File name: redirectplugin.zip | All Files | Open | Cancel

Once activated you will see a new addition to the admin menu on left:

Warning! Stop! You're spending too much on Resale Rights products! Why not download them for free? OK

Posts Redirected

Post Title	Redirects To
Redirect Post Test 	http://terryjett.com
Post Title	Redirects To

Pages Redirected

Page Title	Redirects To	Hidden
Page Title	Redirects To	Hidden
Page Title	Redirects To	Hidden

TIP: Recommend you install the free "WP Hide Posts" plugin to hide forwarded posts from menu. Get [WP Hide Posts](#).

[I Have A Special Offer Just For You!](#)

The plugin admin area serves three functions.

- 1) Shows you which posts you have redirected.
- 2) Show you which pages you have redirected.
- 3) Allows you to easily  navigate to post/page to edit forwarding URL at any time.

Using is as simple as creating a new post or page:

Edit Post [Add New](#)

Redirect Post Test

Permalink: <http://127.0.0.1:4001/wordpress/redirect-post-test/> [Edit](#) [View Post](#) [Get Shortlink](#)

[Add Media](#) Visual Text

Make a normal post/page using good title, which will become part of URL if using permalinks...

Simpler Redirect [Add New](#)

<http://terryjett.com>

Enter the URL to which visitors should automatically be redirected.

Enter the URL you wish to forward to. It can be any URL!

IF YOU INSTALLED THE "WP HIDE POSTS" AS RECOMMENDED, you will see the box on your right. You can hide the posts/pages from appearing if desired. You can of course let them appear if that is your desire.
