

This tutorial will show you the platinum features of Curation Hero.

**Step 1** – Log in to your Wordpress Dashboard.

**Step 2** – Navigate to Curation Hero section from the left hand side and click Curation Hero.

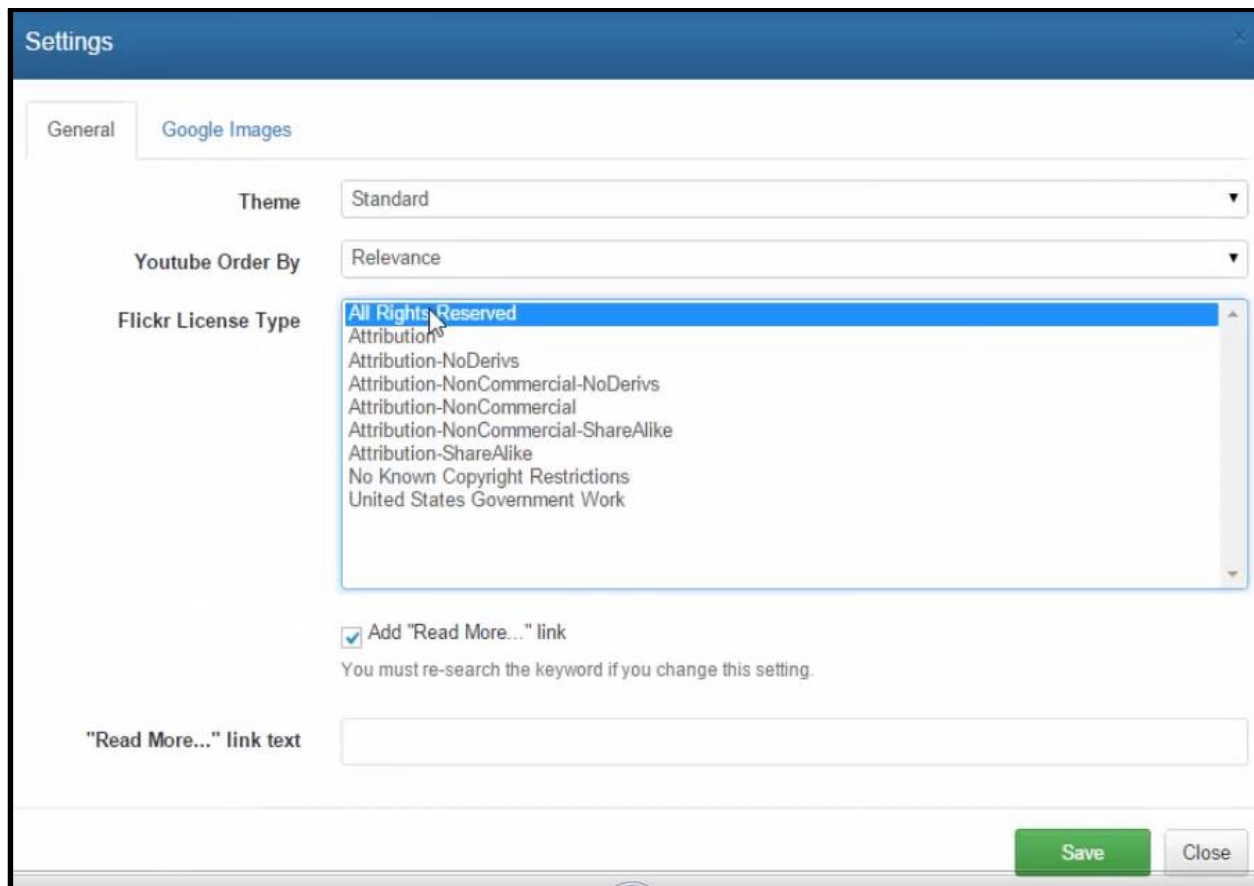

**Step 3** – You will get this page and as you can see, you have the search option and the settings button on the right side.

**Step 4** – Let's go ahead and click Settings button. In this page, you will have the option to choose your Theme, Youtube Order by and the Flickr License Type.

You will also have the ability to add a "Read More" link. Just check the box next to it and enter your preferred word to replace "Read More" only if you wanted to change it. If you want to disable this option, unchecking the box will do the trick.

Once you're done setting it up, hit Save button.

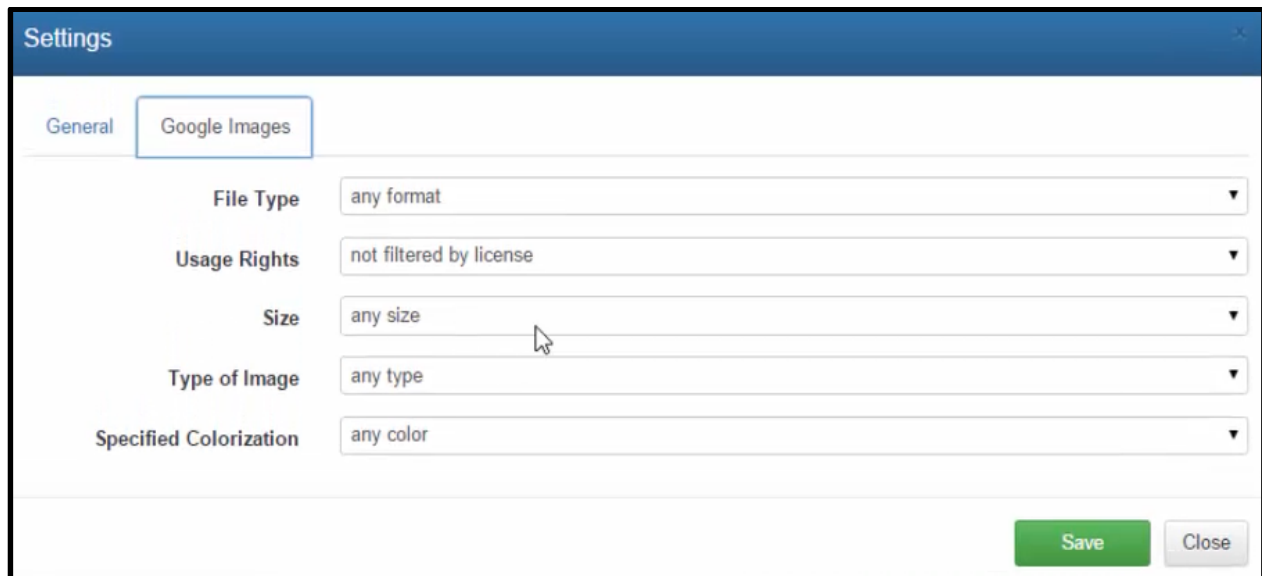

The screenshot shows a 'Settings' dialog box with a blue header and a close button in the top right corner. Below the header are two tabs: 'General' (selected) and 'Google Images'. The 'General' tab contains three settings:

- Theme:** A dropdown menu currently set to 'Standard'.
- Youtube Order By:** A dropdown menu currently set to 'Relevance'.
- Flickr License Type:** A list box showing various license options. 'All Rights Reserved' is selected and highlighted in blue. The other options are: Attribution, Attribution-NoDerivs, Attribution-NonCommercial-NoDerivs, Attribution-NonCommercial, Attribution-NonCommercial-ShareAlike, Attribution-ShareAlike, No Known Copyright Restrictions, and United States Government Work.

Below the license list is a checkbox labeled 'Add "Read More..." link', which is checked. A note below the checkbox states: 'You must re-search the keyword if you change this setting.' Below this is a text input field labeled '"Read More..." link text'.

At the bottom right of the dialog are two buttons: a green 'Save' button and a grey 'Close' button.

**Step 5** – Now, click Google Images tab and you will get this page. You will have some options which I have illustrated below. All you have to do is choose the best option for you and once you're done, hit Save button.

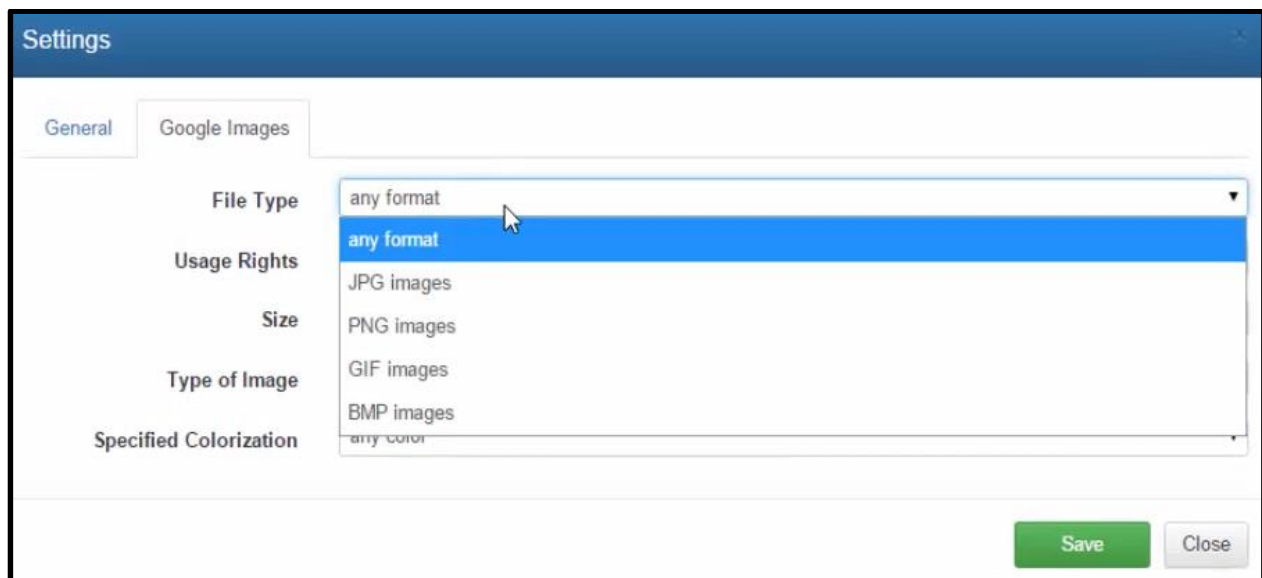

The screenshot shows a 'Settings' dialog box with a blue header and a close button in the top right. There are two tabs: 'General' and 'Google Images', with 'Google Images' being the active tab. Below the tabs are five settings, each with a label and a dropdown menu:

- File Type**: dropdown menu showing 'any format'
- Usage Rights**: dropdown menu showing 'not filtered by license'
- Size**: dropdown menu showing 'any size'
- Type of Image**: dropdown menu showing 'any type'
- Specified Colorization**: dropdown menu showing 'any color'

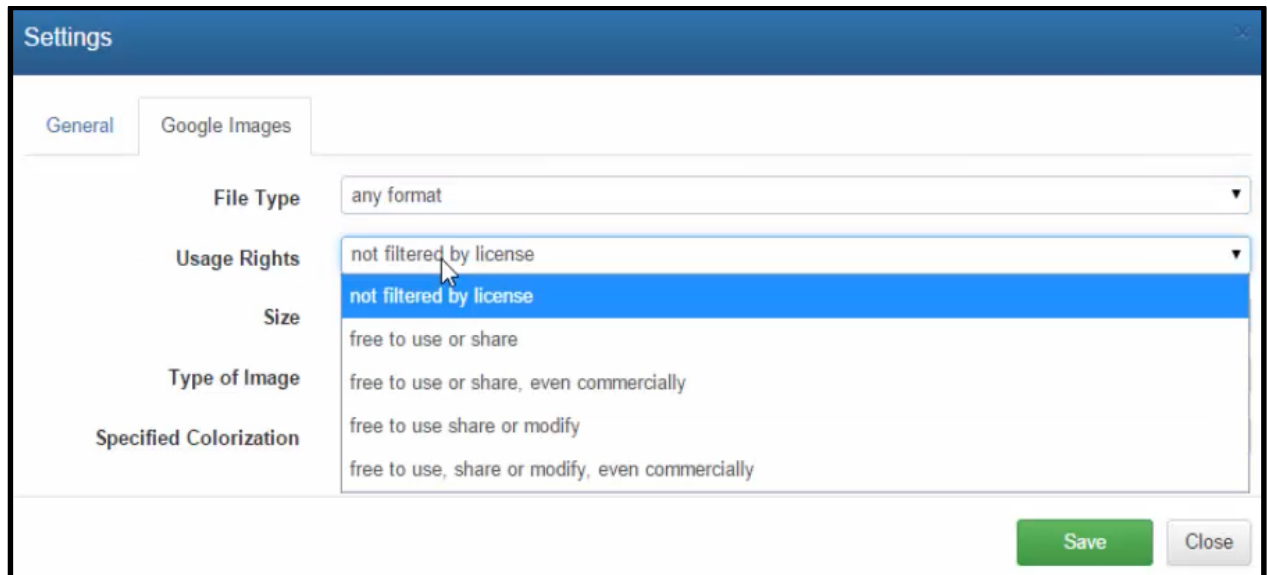

At the bottom right of the dialog are two buttons: a green 'Save' button and a grey 'Close' button.

File Type – This is the file format (JPG, PNG, GIF, BMP).

This screenshot is similar to the previous one, but the 'File Type' dropdown menu is open, showing a list of options. The options are: 'any format' (highlighted in blue), 'JPG images', 'PNG images', 'GIF images', 'BMP images', and 'any color'. The other settings and buttons remain the same as in the previous screenshot.

## User Rights

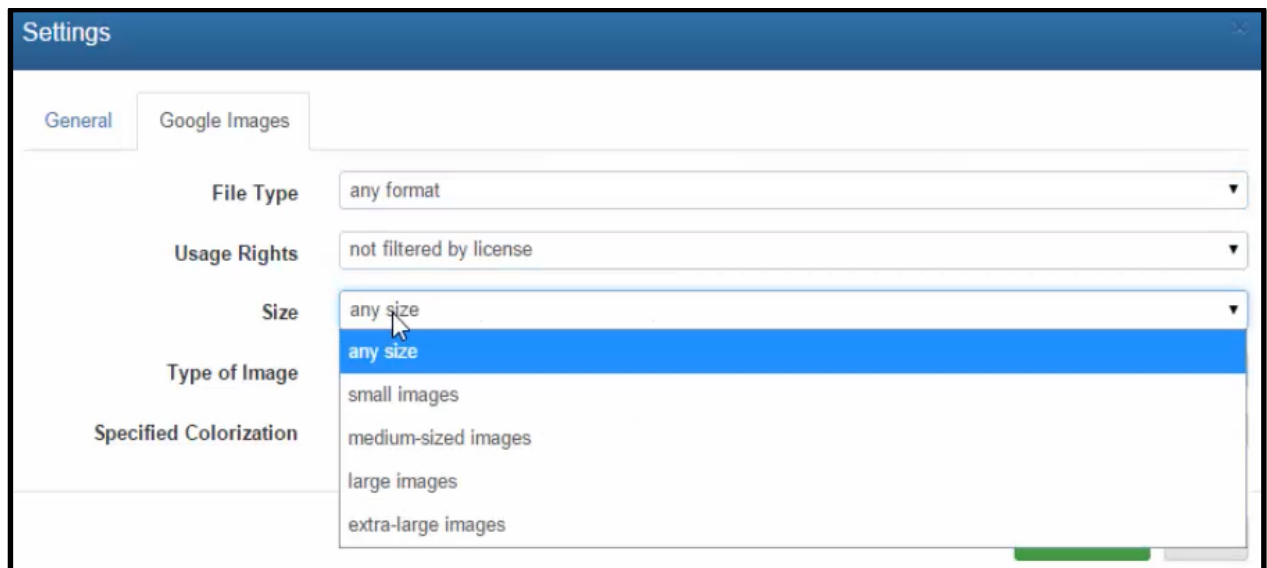

The screenshot shows the 'Settings' dialog box with the 'Google Images' tab selected. The 'Usage Rights' dropdown menu is open, displaying the following options:

- not filtered by license (highlighted)
- not filtered by license
- free to use or share
- free to use or share, even commercially
- free to use share or modify
- free to use, share or modify, even commercially

The 'File Type' dropdown is set to 'any format'. The 'Size' dropdown is set to 'any size'. The 'Type of Image' dropdown is set to 'free to use or share, even commercially'. The 'Specified Colorization' dropdown is set to 'free to use, share or modify, even commercially'. The 'Save' button is green and the 'Close' button is grey.

## Size

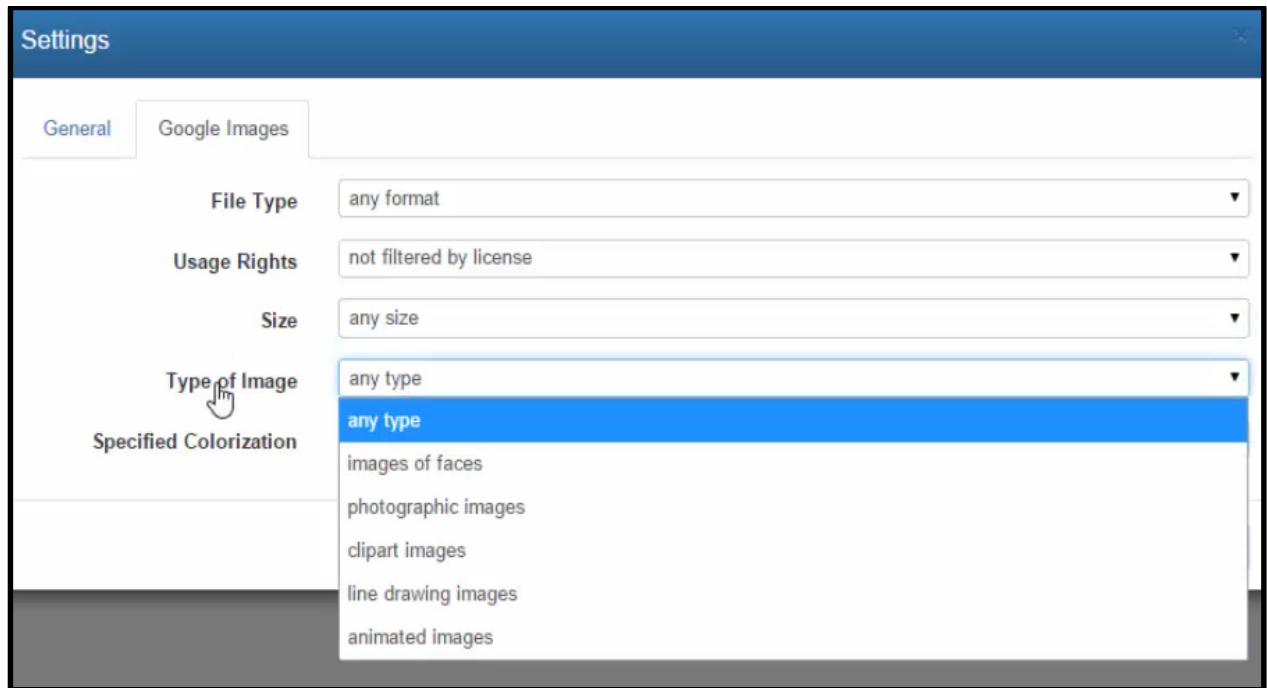

The screenshot shows the 'Settings' dialog box with the 'Google Images' tab selected. The 'Size' dropdown menu is open, displaying the following options:

- any size (highlighted)
- any size
- small images
- medium-sized images
- large images
- extra-large images

The 'File Type' dropdown is set to 'any format'. The 'Usage Rights' dropdown is set to 'not filtered by license'. The 'Type of Image' dropdown is set to 'free to use or share, even commercially'. The 'Specified Colorization' dropdown is set to 'free to use, share or modify, even commercially'. The 'Save' button is green and the 'Close' button is grey.

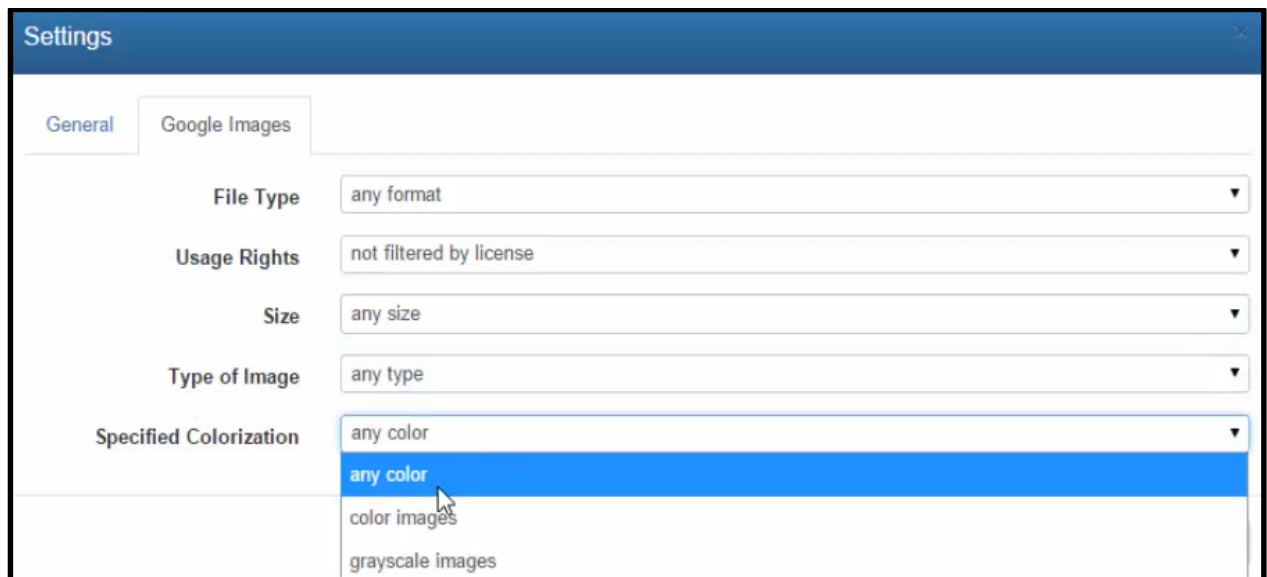

## Type of Image

The screenshot shows the 'Settings' dialog box with the 'Google Images' tab selected. The 'Type of Image' dropdown menu is open, displaying a list of image types. A mouse cursor is pointing at the 'any type' option, which is highlighted in blue. The other options in the list are 'images of faces', 'photographic images', 'clipart images', 'line drawing images', and 'animated images'.

Setting	Value
File Type	any format
Usage Rights	not filtered by license
Size	any size
Type of Image	any type
Specified Colorization	

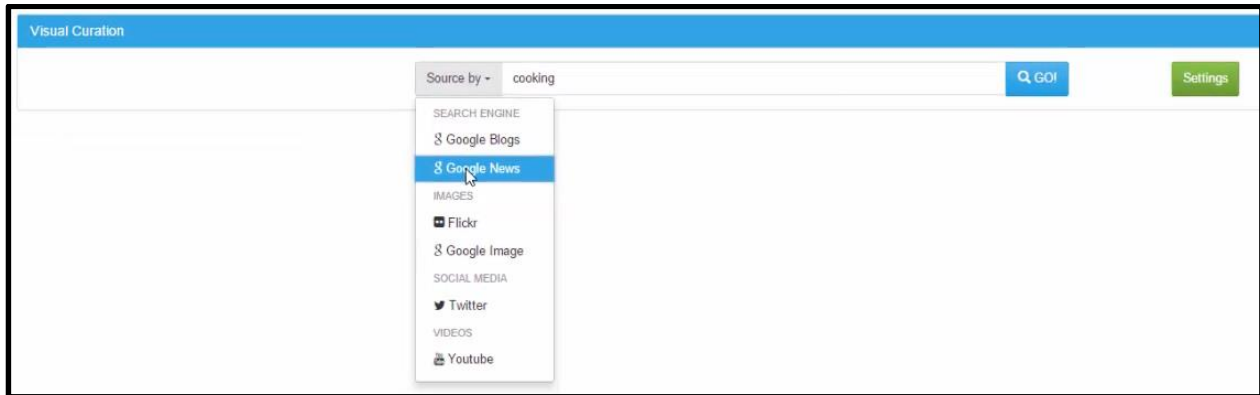

## Specified Colorization

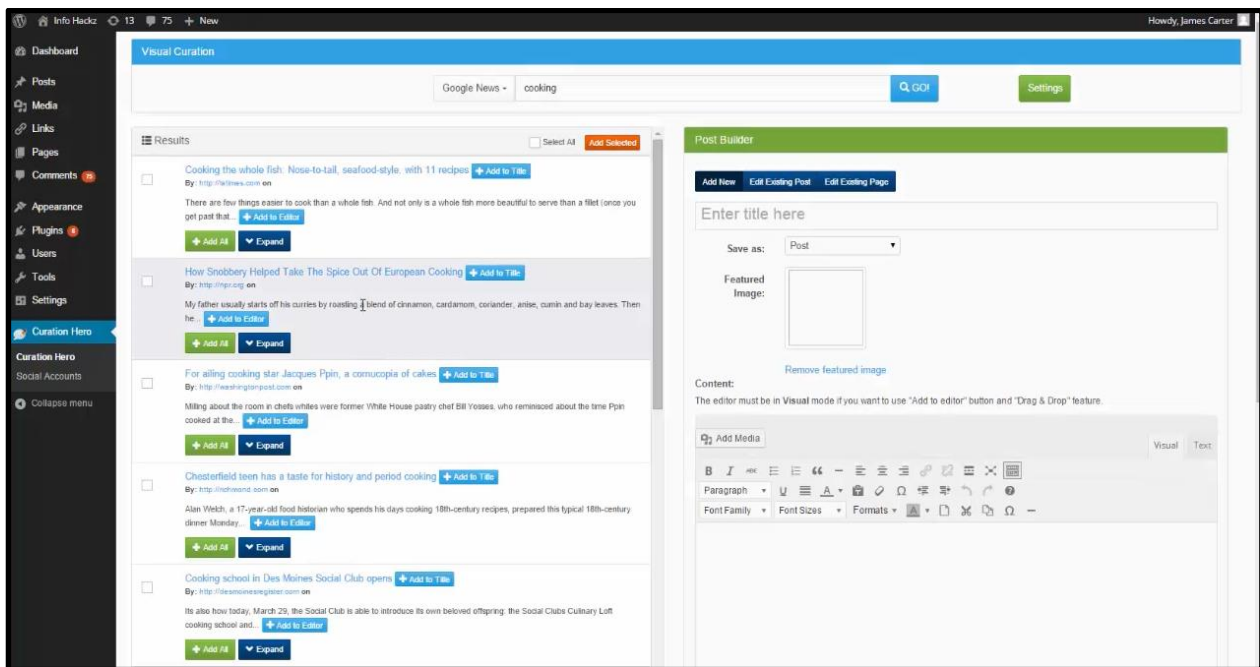

The screenshot shows the 'Settings' dialog box with the 'Google Images' tab selected. The 'Specified Colorization' dropdown menu is open, displaying a list of colorization options. A mouse cursor is pointing at the 'any color' option, which is highlighted in blue. The other options in the list are 'any color', 'color images', and 'grayscale images'.

Setting	Value
File Type	any format
Usage Rights	not filtered by license
Size	any size
Type of Image	any type
Specified Colorization	any color

**Step 6** – Now, let's do a search to curate. Enter your keywords and as you can see in the Source by, we have these options.

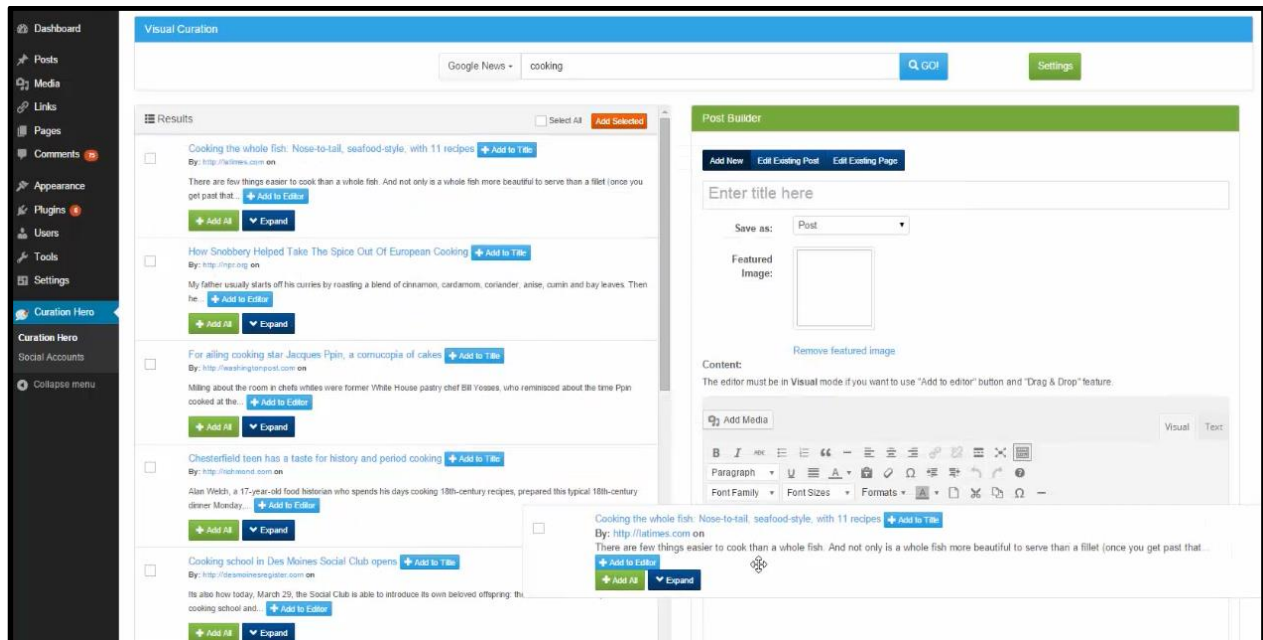

And you will get your search results along with your Post Builder on the right side.

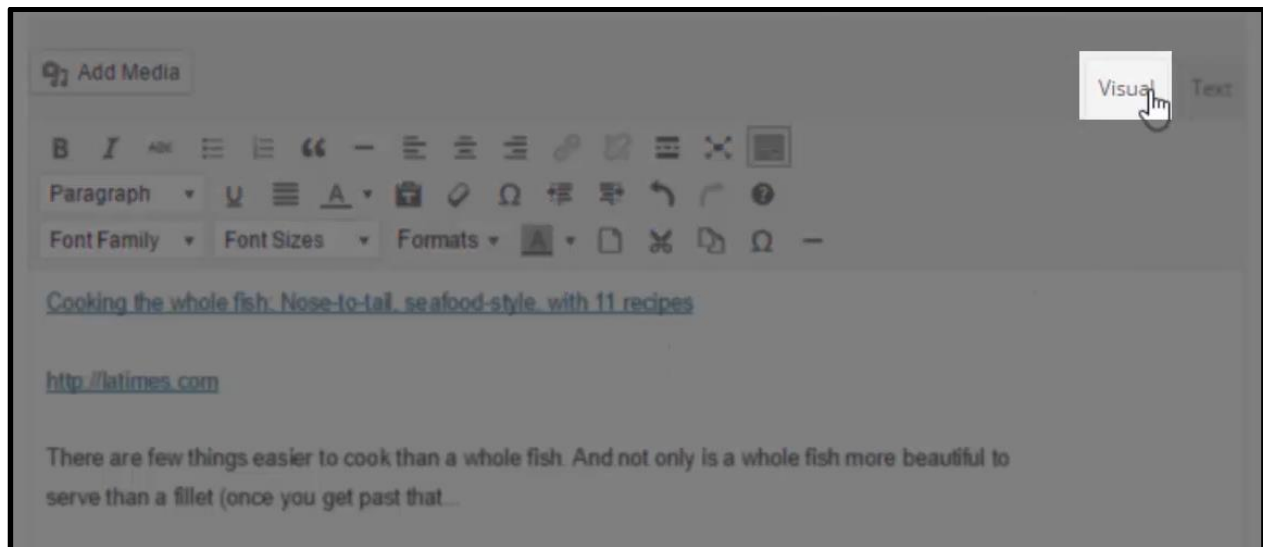

**Step 7** – I'm going to show you different way to curate your results.

The first thing that I think it's incredible is that you can drag it from the results area and drop it to your post editor just like this.

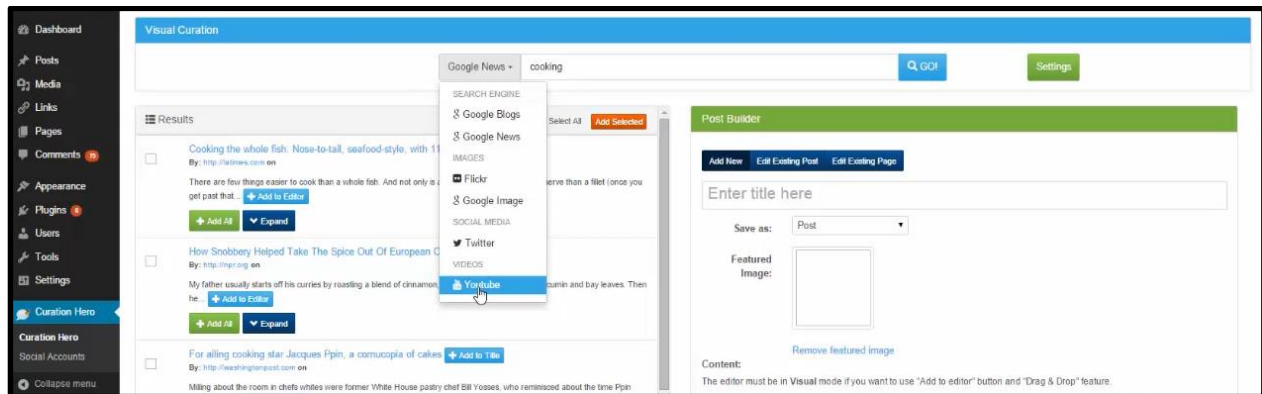

Please note that in order for us to do that is we need to be in the Visual tab.

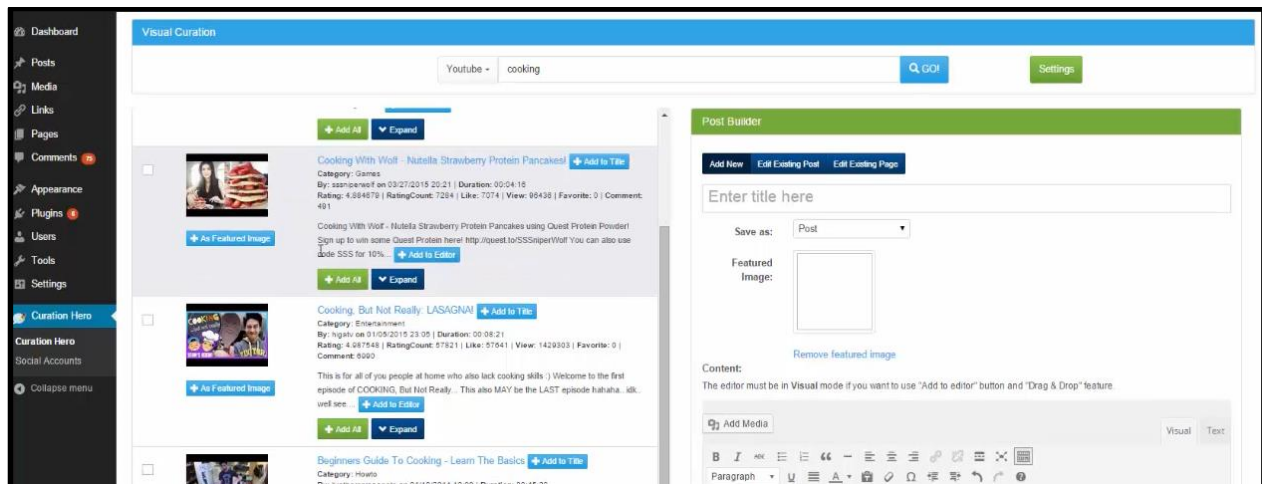

You can repeat the same process (drag and drop) if you wish to add another topic to your post.

**Step 8** – If you want get another source, just click the Source By and select your new source. In this example, let's choose Youtube.

And you will get another search results just like this.

**Step 9** – Click the button **As Featured Image** to set it as the Featured Image on this post.

**Step 10** – Now, we can click “Add to Editor” or simply drag and drop it.

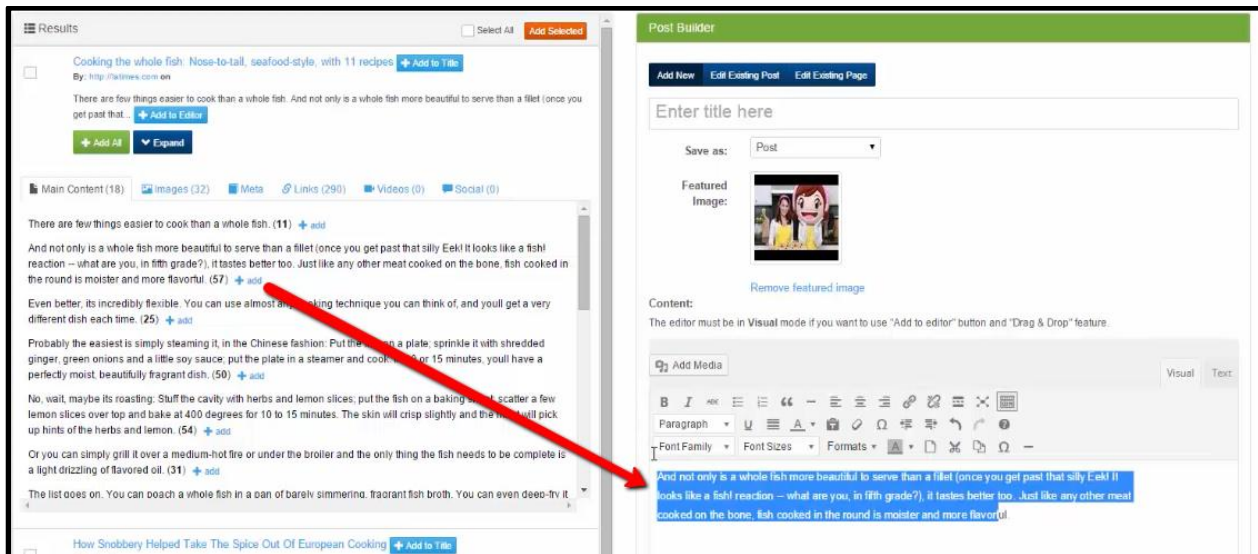

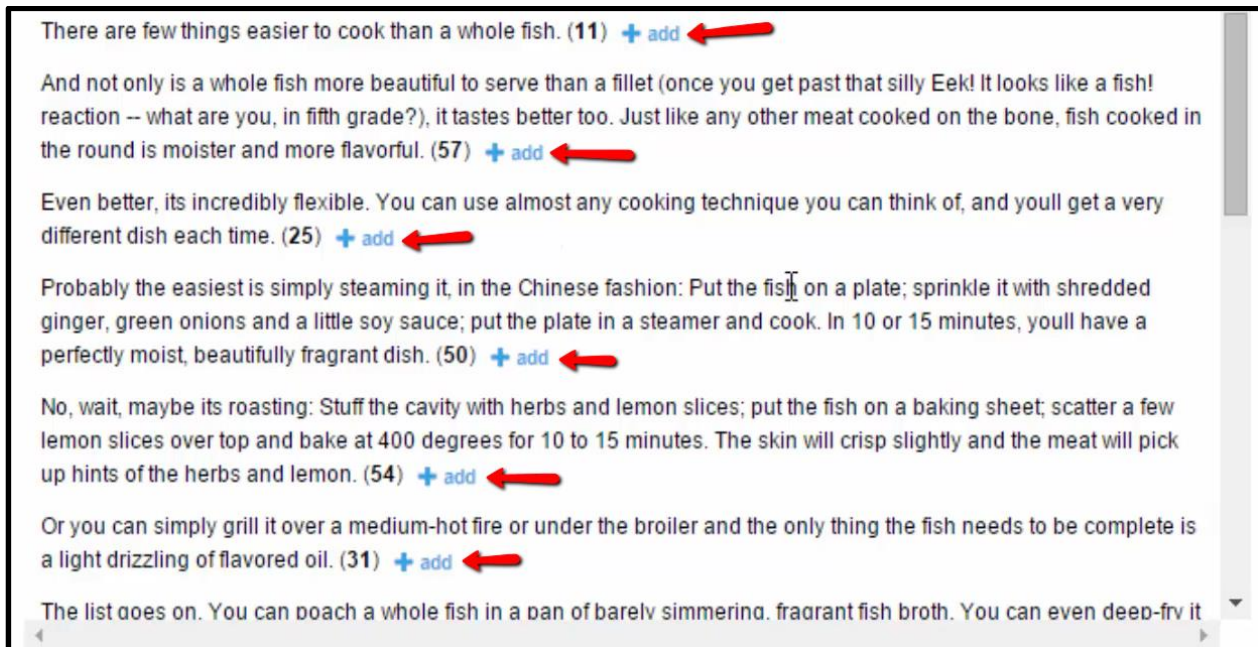

**Step 11** – Now, I'm going to go back and select source by Google News.

**Step 12** – And you will get a list of results. Let's click Expand button to one of the result.

**Step 13** – As you can see, every section has the “+ Add” button. You can click this button and add this section to your post editor.

Please also note that you have different types of options related to this content. You have the ff:

Main Content – These are the text information of this content.

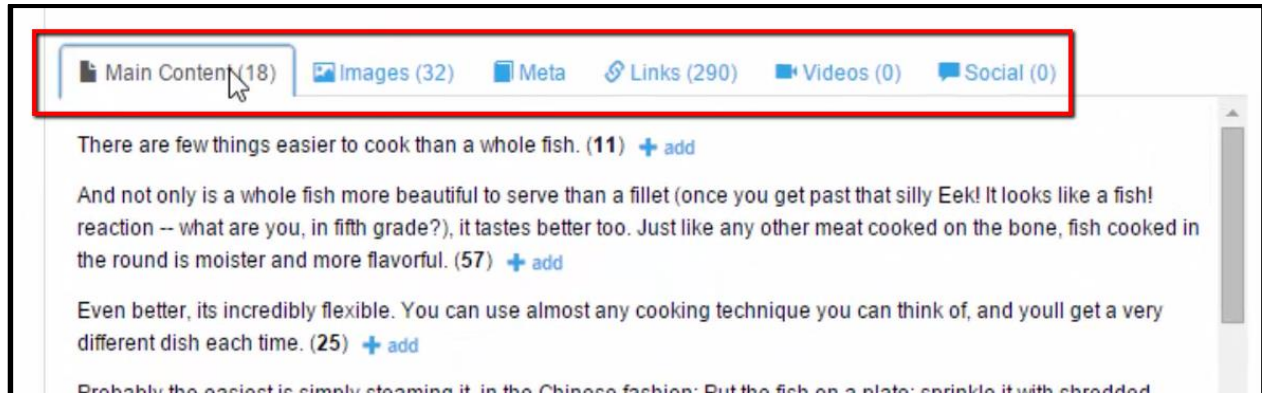

Images – These are images associated on that content.

Meta – The meta keywords or information of that particular content.

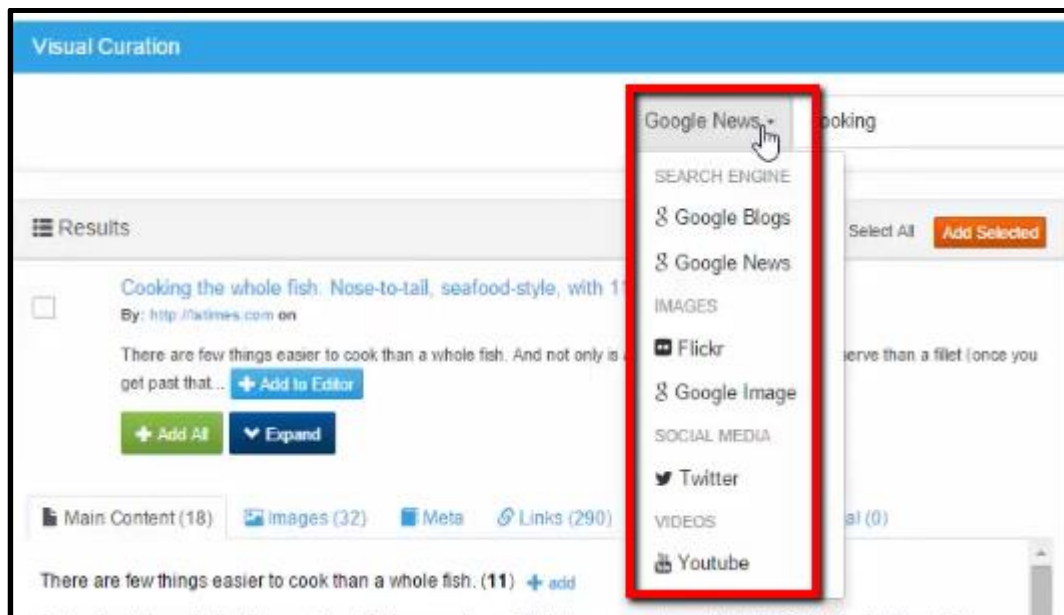

Links – The links associated with that content.

Videos – Any videos on a post like Youtube, Vimeo, etc.

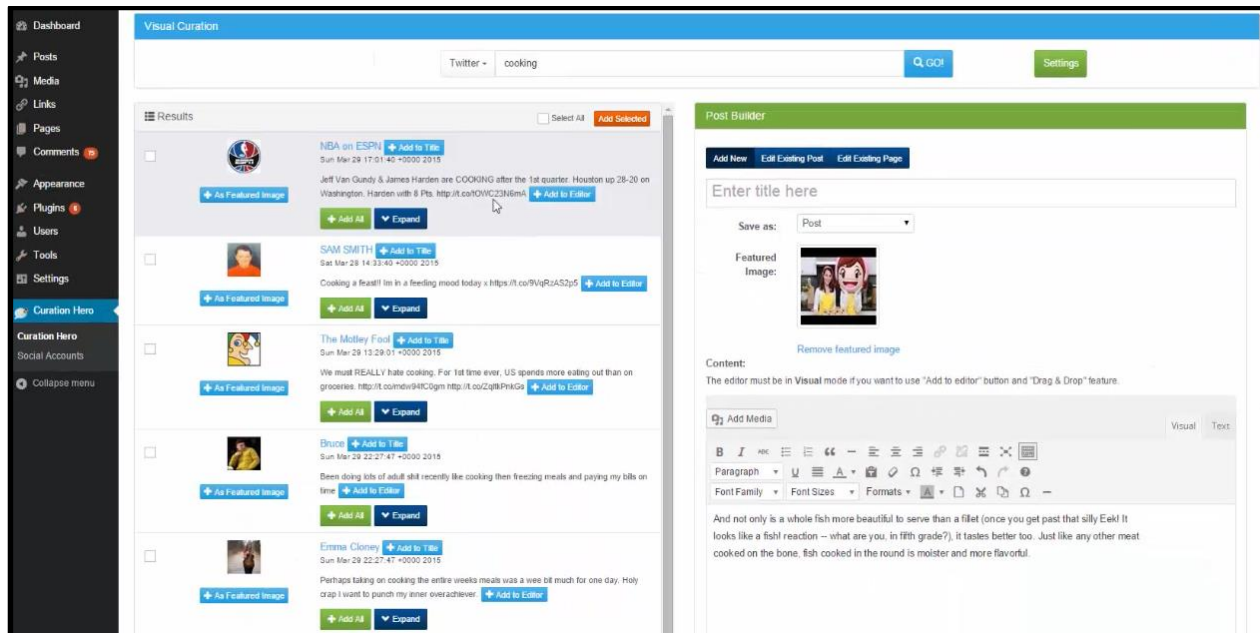

Social – These are social information like Facebook, Twitter, etc.

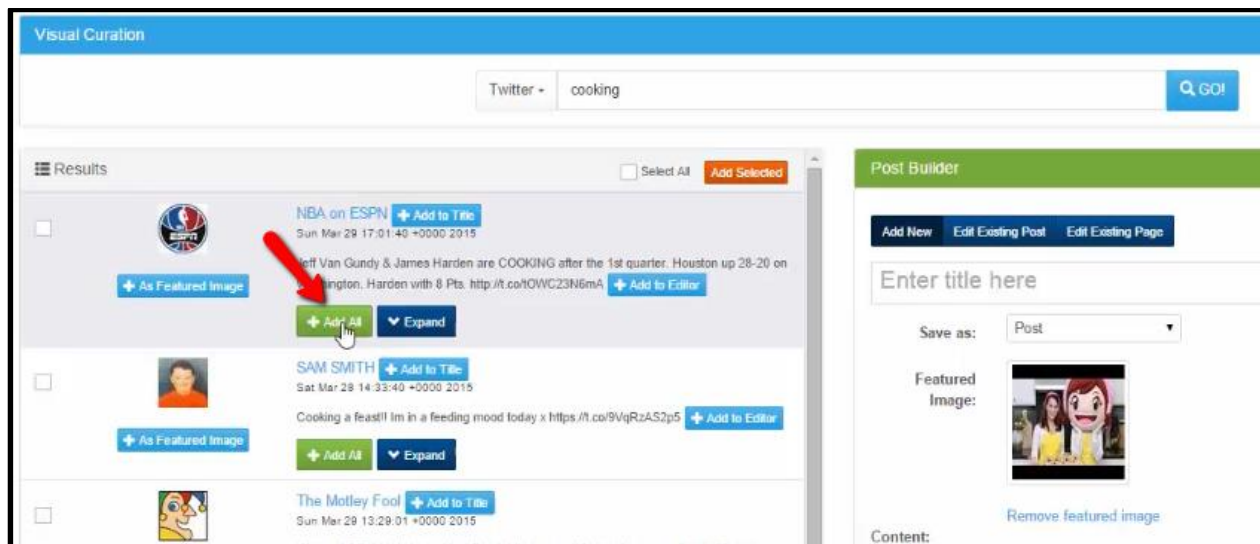

**Step 14** – Let's go back and look for another source. Another thing to note is that you can curate from any of these source. It's totally up to you. In this example, let's select Twitter.

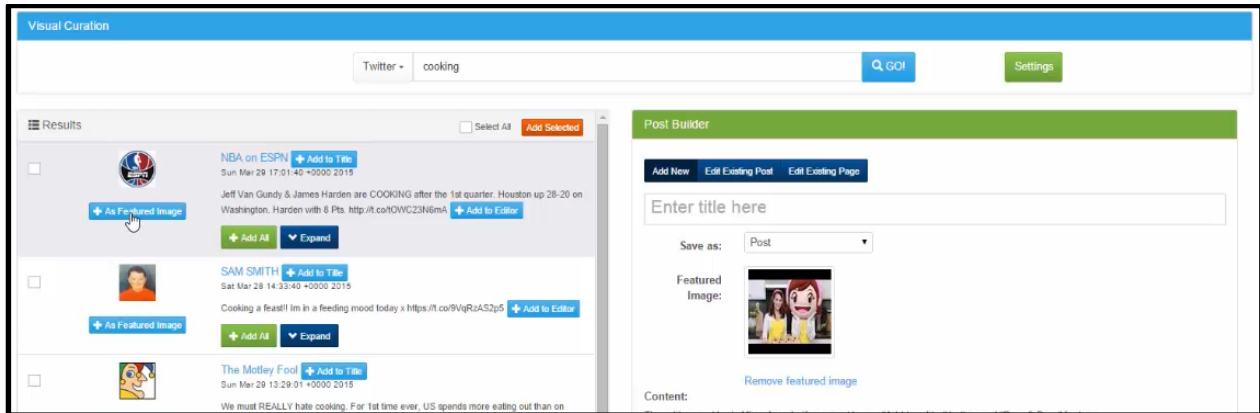

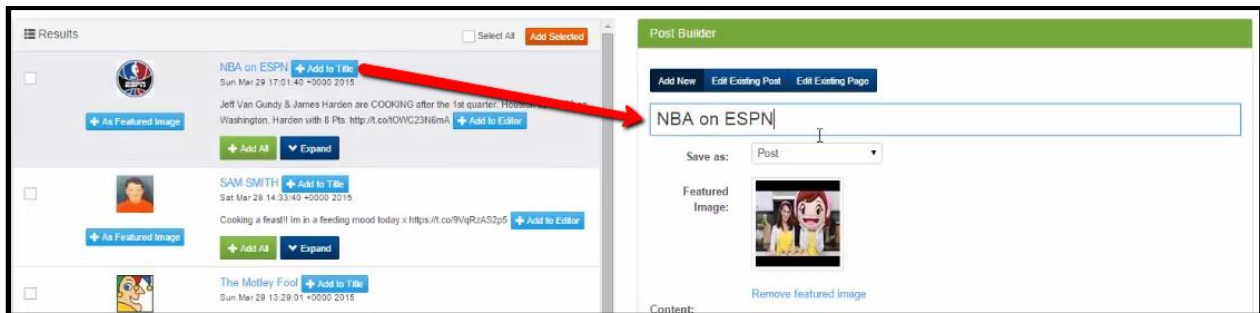

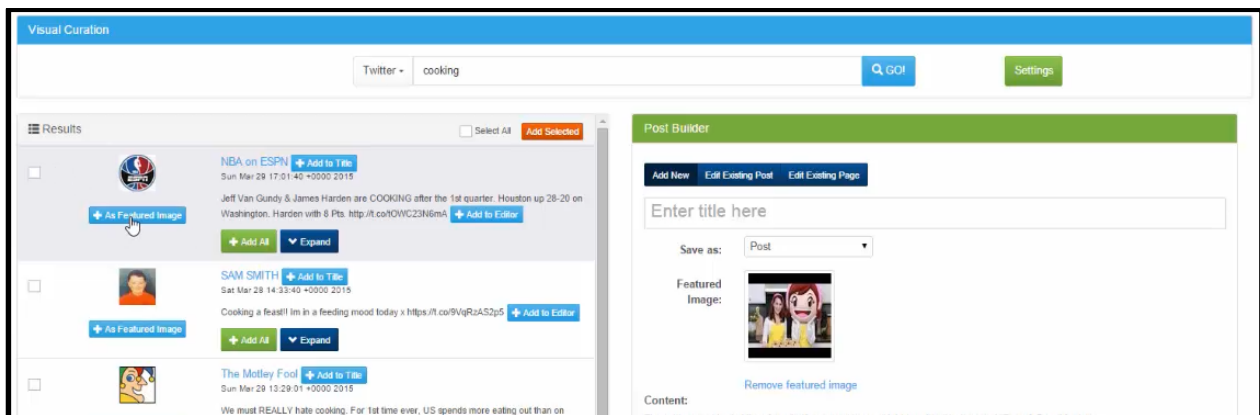

And now we can add a number of tweets to our post as well.

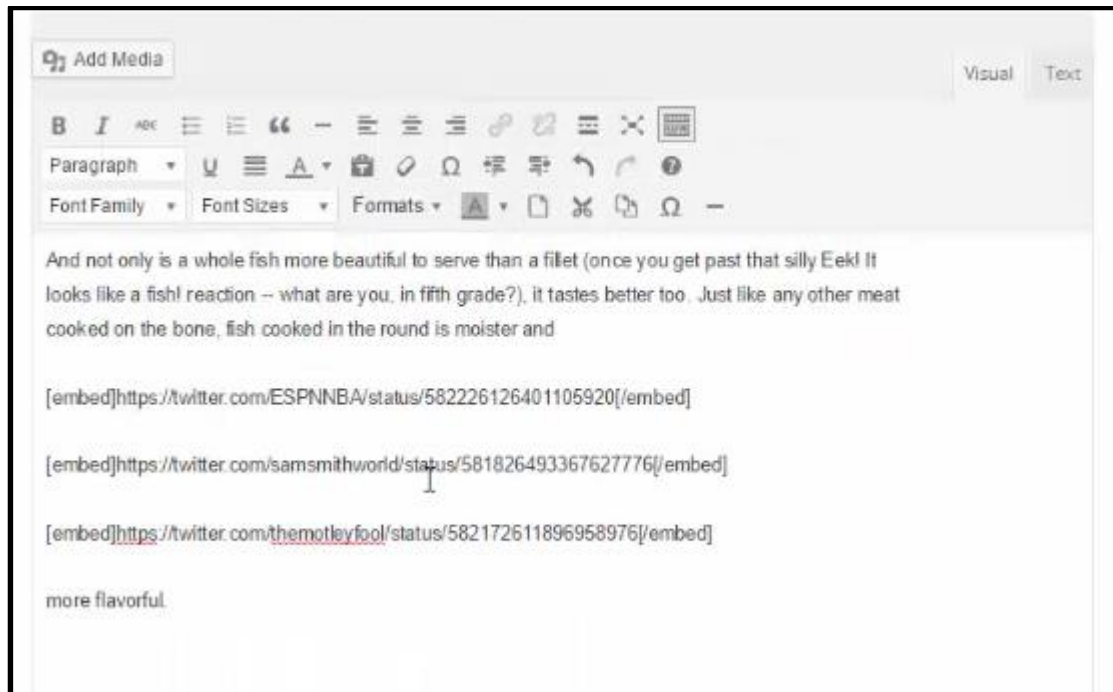

**Step 15** – We can choose to “Add All” to your post editor.

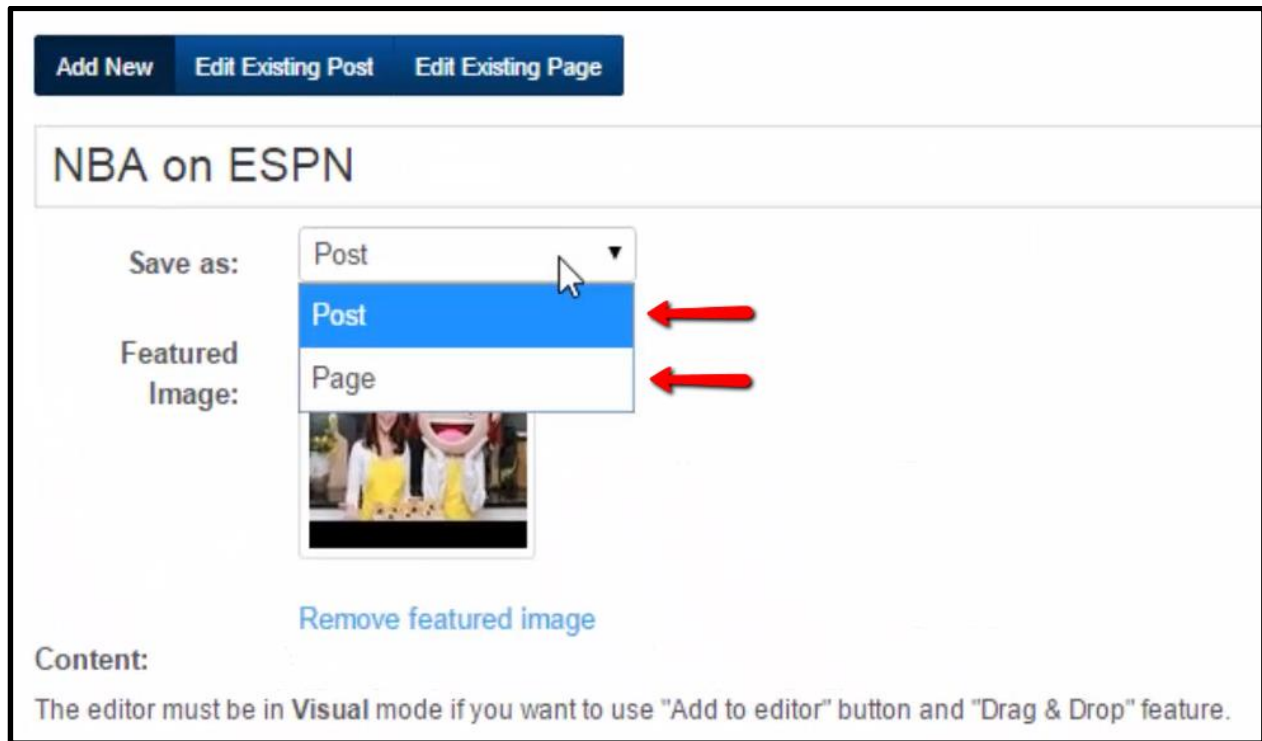

**Step 16** – Set featured image.**Step 17** – Add a title.**Step 18** – You can also select a number of post and click Add Selected.

And you will see that the tweets will be embedded:

**Step 19** – Using Curation Hero will give you fully interactive experience without having to reload your browser. Once your post is ready to go, all you have to do is select to save it as Post or Page.

As I said before, you can add as many social accounts that you want so that you can curate contents to those on auto-pop.
