

List Smasher List Love

Building Powerful Relationships
Through Autoresponders

Ok... here we go.

Relationship building through autoresponder sequences! Let's do it.

So just to let you know a little about these emails that you have signed up for.

These are generally copy and paste templates that you can take and use on your own list to create a relationship as you build it.

This product is called List Smasher X List Love

because that is what you will receive following these emails.

Literally list love, because you will be focusing on creating watertight relationships (as well as promoting some products ;)

To be honest there may be times when you won't be able to just copy and paste (like when you fill out your bio, there's no way you can copy paste that!) but other's will be pretty much copy and send jobs.

These emails are tailored and designed specifically to create rapport, relationship, trust and ultimately a real asset online.

It involves some absolute fundamentals when it comes to list building.

It sets you up in a positive light from the start

OK.

Here are the emails

Email 1

How to create instant rapport

So here is the very first email you will send to someone when they opt in to your list.

You Need:

- An about page (you can create one quickly and easily at <http://about.me>)

- An opt in product link

Email 1

Subject: Here is your [GIFT NAME]

Hey NAME,

Thanks for signing up to receive:

YOUR OPT IN PRODUCT LINK HERE

just in case you missed it I have included a link back to the exact spot you signed up for the list.

I also just want to let you know quickly about my philosophy online.

Firstly I'm one of the "good guys". I'm not here to spam you or promote every silver bullet that hits the market. Not my style.

If you're interested in the over hyped product launches that don't work, then you're in the wrong place, because it's just not like that. Sorry.

Thanks again for signing up :)

How to Create the Life you Want Using Internet Marketing

In this email we are going to be targeting their emotional drivers and giving them some nice desire, motivation and direction.

We want to make them feel good so they remember us and will look forward to our email.

So here is email 2:

Subj: Create the Life you Want (using internet marketing)

Hi,

Do you know it has never been easier or more possible to create your dream lifestyle than right now?

Through the automation of the internet with affiliate sites that tick away as you sleep, or autoresponders setup that keep mailing all through the year once setup.

There are just so many possibilities to create more wealth whilst at the same time increasing your spare time.

Does that excite you?

Because for me it was one of the main reasons that I got into internet marketing (IM) in the first place.

But there is the initial setup, and this is where so many people become unstuck, so I want to address an question that I receive frequently:

"What's the best advice you can give to someone starting out?"

And the absolute best piece of advice is:

"Have a plan and set achievable goals"

Build up to your ideal online income.

Instead of jumping into the goal of \$2,000 a day or \$20k a month at the start build up to these kind of goals (yes they are possible, but maybe not in your first 6 months).

If you start with a target that is too high you'll get disillusioned. Quickly.

How about something a little smaller, more targeted?

Like, \$5 a day, then \$10 a day then move up to \$20 a day.

These targets can easily be achieved and they will spur you on.

One method that is great is to

1) Try earning \$100 a day earlier each month.

So it may take you to the 25th day on the first month to earn \$100, but then next month you may hit it on the 11th day etc, building and progressing.

When things reach a "tipping point" in IM, they take off *quickly*.

Join a skype group, a warrior forum group or a facebook group and hold each other accountable for your progress!

Finally check out this guy called Gary Vaynerchek

He is a super passionate and super successful entrepreneur and most importantly he lives life on HIS terms.

After all isn't that what we all really want?

Did you read the list and think..... It's good, but there is something missing?

Email 5

The Mini Series Begins....

OK so this email we are providing extreme value as well as dropping in a couple of affiliate links.

What you need:

- 1) Become a tradebit affiliate
 - a. Change all tradebit links to your affiliate link - <https://www.tradebit.com/A/>

I've left my links in the copy below. All you need to do is change these to your links.

Those of you that are using these emails to their full effect are making a smart move. Really.

We are creating a customised autoresponder sequence that WILL make you money for potentially years to come.

Don't underestimate the power of this.

Let's get into it.

SUBJECT: [KLB] Quickly Create an Opt-in offer (email 1 of 4)

Ok so the very first thing you need to create your very own traffic source is:

- 1) Creating an opt in offer (bribe) to get people onto your list.

So let's do it hey?

Ready?

There are loads of different ways to create a product. But I am going to show you the quickest and easiest way to get it done.

I need to tell you something very specific about this process but I'll get to that in a bit.

The hardest bit about this process is learning it / reading it. Once you know it, it is super powerful.

It may not be sexy, but boy oh boy does it work!

Are you ready?

Ok let's get into it.

We are going to look at using PLR to get a product up and complete quickly.

Now stick with me here, because very few people actually get this right, and plenty get it wrong.

Right = success. Wrong = failure.

The way to understand this is you are using someone else's "brain power". You are taking their information.

Taking the best bits and making something 100x better with an inch of the effort.

That is cool no?

The site we are going to use is:

[Tradebit.](#)

Now this is one of the best sites to get hold of quality PLR for a snip!

Let's create a list building product as an example of a product that we want to create.

Say you want to create a product about how to build a list (however this could be anything... how to build a shed, how to make iphone apps, how to learn piano... anything really)

But let's stick with the list example.

Go to [Tradebit](#) and use the search toolbar:

Enter this: How to build a list

Now check out the results, there are hundreds of products out there that you can take to repurpose for your use and to garnish the brain power of people that have come before.

Find a title you like. There are some good ones, so just pick one.

Now search for it again but this time put it between quote marks (you know these things " ")?

For example search "product name" in [Tradebit's](#) search bar.

What this does is give you an instant discount! You can see all the different prices, usually a lot cheaper than the first results.

Next step is to download one you like.

So now we have just bought and downloaded a bit of PLR.

Now we get into the juicy bits. This is the part no one really knows about.

Excited?

Good it's going to make you money.

We are going to open up the product we just bought and look through it.

Just a quick glance over it looking for points that stand out. Looking for the "golden nuggets", looking for the absolute best bits.

You can use the highlighting function in word to extract and highlight the best bits.

But here is the point it becomes even more awesome. We are going to get someone else to do this "boring" bit for us. The nugget search.

Have you heard of Jing? It's a free tool.

<http://www.techsmith.com/Jing/>

Basically Jing allows you to create 5 minute screen captures

(videos) of what you are doing. Short, sharp, to the point. And then host them on THEIR site.

No fuss. No recording equipment. Nothing.

What we are going to do is create a quick screen capture (video) of the process we are doing (looking for golden nuggets).

And we are going to send this screen capture to an outsourcer.

We are going to get them to do it for us for about \$5.

We are going to say something like this on the [Jing](#) screen capture video:

"Hey outsourcer, can you please look through these documents and extract the best bits (there is no right or wrong way to do this) just get the bits that stand out and place them into word file in an ordered fashion."

You can get jing here → <http://www.techsmith.com/jing/>

And you can get an excellent outsourcer here →

<http://odesk.com>

Or you could use fiverr if you prefer. It's up to you. Just make a quick video instruction and point them to the screen instruction url on jing. Awesome no?

Just in case you haven't fully grasped how awesome this is and the potential just yet here is a step by step video how to setup jing and send to an outsourcer:

<http://www.youtube.com/watch?v=MrAuBJW2K28>

Once you have got all the golden nuggets from your outsourcer I recommend you do this:

Get them to place it into a mind map format using this software (it's free):

<http://freemind.en.softonic.com/>

So they have placed the information into a nicely ordered mindmap for you to use as you wish.

Now you have two options either:

1. Turn it into a mind map presentation yourself
(talking through the main points)

Or

2. Go to fiverr and get someone to go through it with you.

Here is a job I found of someone offering this:

[Fiverr Mindmap Job](#)

Suddenly what do we have here?

A new concise, killer product that people would actually be interested in.

We now have a product that shows only the very best golden nugget ways of how to build a list.

People love this and they will *happily* pay you for it.

Quick and easy. You really didn't even do that much. You could knock that out in under an hour.

One hour and you have your very own opt in product.

Cool (profitable) stuff.

Ok so they are the main steps involved in creating just one type of awesome simple product.

Pretty simple right? And the best thing is you don't even have to do most of it.

1. You can literally buy the product at Tradebit
2. Make a quick Jing video highlighting what you want done (extract golden nuggets and placed into word doc or mind map)
3. Talk through the process as a mind map presentation.

That really is 3 simple steps.

Wow that was one of the biggest emails I have ever written, without a doubt.

And I feel like I should end it there but there is still so much more I want to show you about this.

Maybe even the next part is the most important?

Next we are going to be putting up our squeeze page so we can start collecting emails.

Please make sure you go and create your product now.

Just follow the steps, because next we are actually going to put this to good use.

So make sure you open the next email ok?

See you then,

Rob Stafford

PS. How awesome is it outsourcing product creation? I didn't even know it was possible until recently. Wow what a difference that has made!

PPS. Yes there are affiliate links within this email. But I only recommend what works.

That's it for this email. See how we are being helpful and also monetising the email.

People are going to respond well to this style of marketing and you will stand out.

Look out for the next email in the sequence.

Getting warmed up here.

Straight into it now.

[KLB] Putting up your squeeze page (email 2 of 4)

Hey NAME,

How did you go creating your product?

I know that the first time it probably isn't as simple as you hoped but with *practice* I promise you will get better.

So I'm going to assume you have your product, now we need a squeeze page.

The one I use and recommend can be accessed here:

<http://listsmasherx.com/listtest.html>

It's really effective and works well.

Make sure you grab that.

(It was one that Ryan Deiss actually created and tested.

He loves his testing and yes it does convert like crazy.

So he tested it. I took it.

Shortcut.

Thanks Ryan ;))

Use it. It's powerful.

Next step is to get it installed on a site.

To be honest I actually got someone to do this bit for me.

I paid someone \$10.5 to upload and install this.

Saved loads of messing around.

If you want the details you can contact one of these guys:

<https://www.odesk.com/users/~43fdd889ba4287ea>

if he's not available try this guy:

[Great worker from the Phillipines](#)

I'm not a fan of the technical stuff. Are you?

I figure if I can get someone to do it for me then that is what I am going to do.

Or if you need some guidance about how to put up a squeeze page you can check out this youtube video I found for you:

http://www.youtube.com/watch?v=cSUq24fV_zY

This is about to get crazy.

Do this now and by the time he has replied and got the page up for you the next email will be with you.

Speak then,

YOUR NAME

PS. Do this NOW. I promise it is worth it. 100%
And it's easy.

You have the squeeze page.

You have access to outsourcer.

Now connect the two. And you're done.

PPS. I completely forgot to talk about which email provider to go with.

Well safe to say [Aweber](#) is my favourite and most recommended.

For a reason.

Use them.

Absolutely.

Email 7

The miniseries part 3

Let's continue on here, gearing them up and educating a little about traffic.

With this email you will need to apply to become an affiliate of List Smasher X because we are introducing a soft sell wrapped in value. (At time of writing this offer converts at 8% at you get 100% commissions on the front end and 50% on the back)

Apply for those here:

<http://www.warriorplus.com/affiliate/offer/7191>

<http://www.warriorplus.com/affiliate/offer/7152>

Let me know you are part of LSXLL and I'll approve you instantly.

[KLB] Traffic (email 3 of 4)

Here we go the lifeblood of any business.
The life blood of any cash-flow.

Traffic = people = cash.

Read it again.

Read it again.

Learn it.

With a list we are driving traffic to our brand new squeeze page and building a long lasting online asset all of our own.

Awesome.

There are two ways to get traffic:

1. Paid

2. Free

Paid traffic scares a lot of people but it is quick.

Free traffic is low risk but it is slow.

So I'm going to give you two methods each here so whichever way you choose you will be covered.

So for the paid method we're going to use solo ads.

Solo ads are basically when you buy a mailing to another marketers list.

They promote your offer in exchange for an upfront payment.

Here are my top two recommendations for solo ads:

1. Igor Khefits

It took me a while to find someone that was super awesome at getting me high quality traffic to my opt ins.

As I said I got stung.

But this guy *really* came through for me.

Top notch traffic.

You can check him out here:

<http://www.igorsoloads.com/> (not aff link)

2. Paul Prissick

Really lovely guy that offers exceptional value for money

Once again quality traffic.

Go get one from him too. Full review and link below:

<http://innercirclesoloads.com/innertribe/paul-prissick-solo-ads-review/> (not aff link either)

There are a load more great solo ad sellers out there and you can

get them all in a pretty awesome course called [List Smasher X](#).

It teaches you a step-by-step guide to building lists online.

Just really way too much to cover here.

Use these guys to begin with though.

Use paid methods for quick windfalls and if you want to build your business and wealth really quickly.

And who doesn't right?

Now Two Free Methods of Traffic

1. Warrior Forum Sig Links

The WF is your target market for IM. That is where you will find so many of your clan hanging out.

Update your signature in the WF and get in there and start posting loads of responses, content and generally helpful information.

That's the key though. Make sure it is useful.

2. Videos

You can create helpful videos with a link underneath that directs the view to your squeeze page.

Just give some of your valuable content away, or create a little screen capture teaser, then underneath have a link to your squeeze page.

Obviously I prefer paid methods. it's just quicker and easier.

Once you know what you are doing it super easy to build your business fast.

It's a funny thing with list building.

Once you start driving sales off of it. People really start to notice.

Things become a lot easier.

It's all about leverage.

Once again your list doesn't need to be massive to get this and can be small just with a great relationship.

I'm going to talk more about relationship and its importance in the next email.

The miniseries finale

Here it is.. the final part of this four part mini series.

Let's get into it!

[KLB] Relationship (email 4 of 4)

This is probably the *most* crucial part of this mini-series so far.

I mean it.

This is about the relationship you have with your list.

Powerful stuff.

The relationship you have with your list can be like a
DRUG for your subs.

They can get all giddy and weak kneed.

Sometimes they can even beg for MORE information.

To hear from you MORE.

They will pay ANYTHING to have it and have it NOW!

Crazy right?

Who wants to hear more from a marketer?

Generally people are busy deleting or unsubscribing.

The good news?

It's actually pretty simple to get people to WANT to hear from you.

It's all about how you setup your message.

Oh yeah and treating them like real people.

When I started to use this little combo BAM list building became super profitable.

I mean s-u-p-e-r.

It was like a list building profit cocktail.

And the best news?

You can do it too

Promise.

100% you can.

Does it take a little setup?

Yes.

Is it worth it x1000?

Absolutely it is.

Here are 2 quick keys to relationship building with your list:

1. Give Value

Demonstrate value to your subs when they opt in.
Give them top quality information that actually HELPS them get where THEY want to go.

2. Create stories

Frame it up in little stories that engage your reader.
Frame it up in little sequences so they are actually being entertained and educated.

Now I didn't invent this story stuff.

No way.

But when I implemented.

Boy oh boy.

That was the trick.

Notice these emails?

Notice how they're laid out?

Well a guy called [Andre Chaperon](#) taught me how to do this.

He is an absolute legend that actually gives a damn about people online.

He has a free list building course too.

You NEED to check it out here:

<http://listsmasherx.com/system/go/andrelist/>

go there and just check out the way the guy writes.

I think you'll see he does things differently.

Classy comes to mind.

If you have any questions about his stuff shoot me an email.

Just hit reply when you get this.

I'm happy to help.

That's really it.

Oh except the one final thing.

If you want to pick up the full [List Smasher X](#) system I recommend it.

It's the place where I have learnt loads about creating lists online.

Simple. Easy to follow.

Otherwise stay tuned....

I have some more killer content on the way.

Time Management Mini Series

[Field]

One of the biggest things people struggle with online is time & discipline.

Maybe you struggle with this?

In this short mini series we are going to help people solve this problem.

Option: If you know a good helpful time management product like an ebook or system then you can add it in the PS.

(something like, the way I learned this system was from "X" product, If you want to learn more about it then you can check it out here:

LINK TO PRODUCT)

I don't currently have a time management product I recommend, but you might know a good one?

Let's begin

Subj: Struggling with time? (Part 1 of 2)

Hey NAME,

I broke this email into two parts for a reason.

I'll get to that in a bit.

In this email I want to show you how to hit maximum productivity levels using a simple time management system.

It is pretty awesome and helps me get a whole load of stuff done.

First thing write A, B, C on a piece

of paper.

Next under each heading write

A. the 3 most urgent and pressing things you need to get done.

No more than 3 because this is your high priority list.

B. The next three most important things.

Things that can wait till tomorrow but will need to get done tomorrow.

C. Other non urgent items that you know you will need to get to but they have a little time behind them so you can hold off a little.

So that is the simple way I like to keep track of items.

Now I don't always have my notepad with me so I use an awesome little app that I picked up that keeps me productive.

It's called 'Clear'

<http://itunes.apple.com/au/app/clear/id493136154?mt=8>

It looks like it is only for iPhone at the moment but if you are looking for productivity app that is a great one.

Tomorrow I want to tell you about a free time management tool that I use that keeps me super organized.

Oh yeah the reason this is broken into two emails is that it's way easier to digest.

It's bite sized.

I know you're time poor :)

The Survey Method

Today we're going off road a little.

We're taking a risk...

Basically to really understand what your list wants to hear about next you can send them out a some questions.

Let's take a look at this.

Subj: What do you need help with?

Hey NAME,

So I've sent you out quite a few emails over the past few weeks

And I think we know each other pretty well by now.

So I want to ask you something...

Which direction do you want me to take next?

What do you need help with?

Is it:

- Building a list online?
- Affiliate marketing?
- Product creation?
- Conversions?
- Traffic?
- Coaching?

or some other area?

Simply hit reply to this email and let me know what it is you are actually looking to get better at.

YOUR NAME

So that is the simple survey method.

Once they reply to that email, you can take them down the path that they are interested to learn more about.

The only problem is....

I don't know which path that is... so you'll be on your own.

But you'll do great!

Quick Targeted Traffic

So with this email we are tying it back to our previous list building emails.

But here we are talking about solo ads.

You will need to request approval for these offers here:

<https://www.jvzoo.com/affiliates/info/64369>

Let me know you are part of the [LSXLL] series and I will approve you instantly

Hey NAME,

So you remember before when we were talking about building lists?

You remember how there are fast and slow ways to build a list?

Well one of the quickest ways to build a list online is through the use of Solo Ads.

These are basically ads sent out to other marketers lists.

BUT

It can be dodgy

and people can rip you off.

Easily.

So when I saw this:

Inner Circle Solo Ads (<http://innercirclesoloads.com/latesttop10.html>)

I got pretty excited.

Why?

Because this guy has done all the work.

He's weeded out the fraudsters.

He's narrowed it down to just the lists with buyers on them

That's some pretty incredibly powerful stuff right there.

You no longer have to engage in this risky behaviour.

It's been taken care of.

If you are interested in building your list quickly and easily risk free.

Then this is for you (LINK)

Let me know if you have any questions,

YOUR NAME

That's it.

That's the full 16 emails that are crafted to build your relationship with your list. You can use these as a foundation and really create your own powerful follow-up series from here,

Let me know how you go,
