

How To Install The Viral Script

Step 1. Download the script by clicking on the link below:

=> [CLICK HERE TO DOWNLOAD](#)

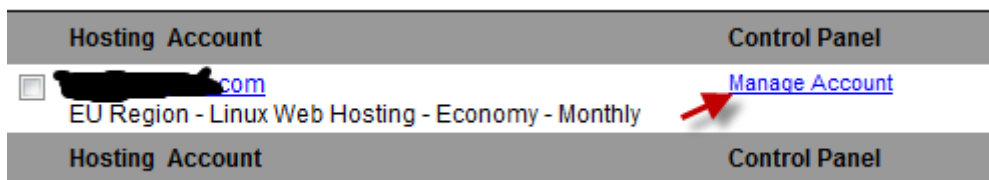

Step 2. Create a new folder on your hosting server (this is where you will install the script and set up the giveaway page)

It should look like this:

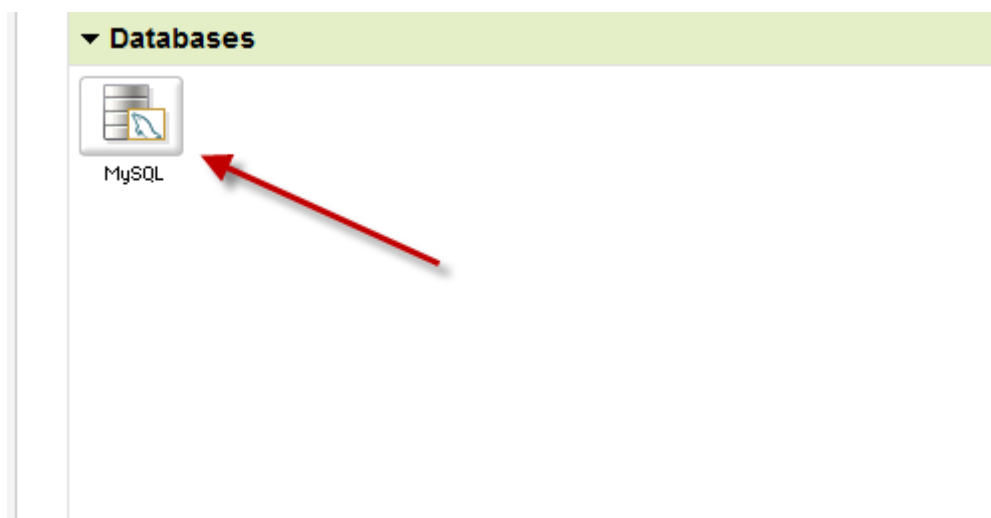

<http://www.yoursite.com/giveaway>

Step 3. Now you need to create a Mysql Database so you can install the script.

Go to your hosting account and click on Manage Account.

Click on Databases > MySQL and create a new Database.

Create Database			
Database List		Displaying: 1-1 of 1	
	Description	Status	Action

Enter the name, username and password for the database and click OK.

Create Database

Description:

MySQL Database/User Name:

New Password:

Confirm Password:

Read-Only User Name: (Optional)

New Password:

Confirm Password:

MySQL Version:

☒ 5.0

Allow Direct Database Access

☐ No ☒ Yes

Note: Databases with External access are located on separate server than databases without External Access

Strong Password

[How To Generate a Strong Password](#)

OK

Once you've made a new database you can proceed to the next step.

Step 4. Now click on Manage via phpMyAdmin .

5.0	viralpage	Manage via phpMyAdmin	viralpage	Setup		
-----	-----------	---------------------------------------	-----------	-------	--	--

Enter your username and password.

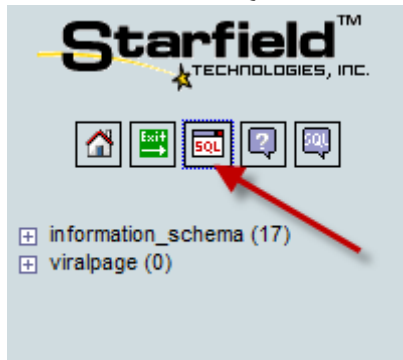

Log in

Username:

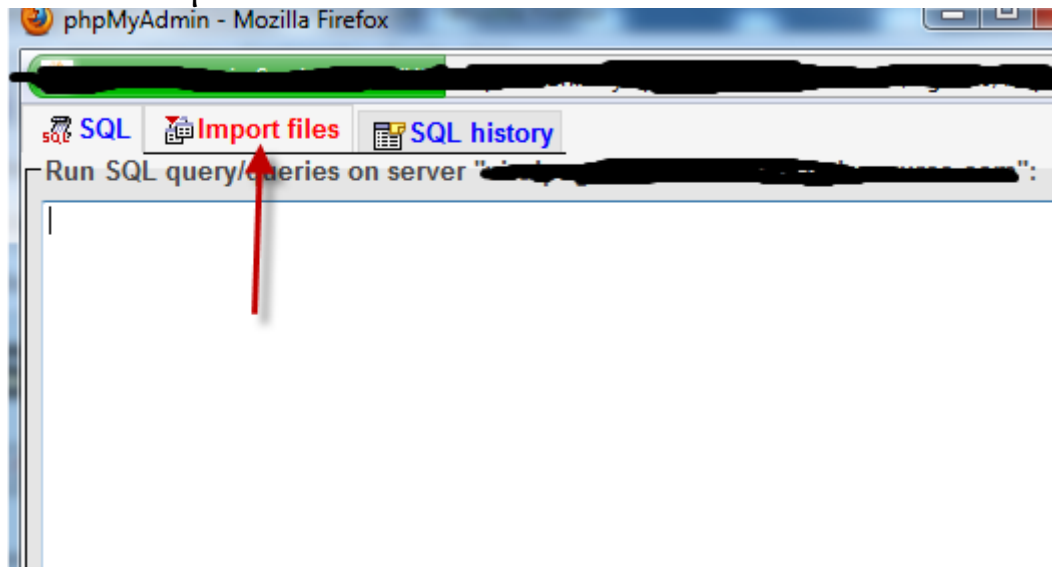

Password:

Go

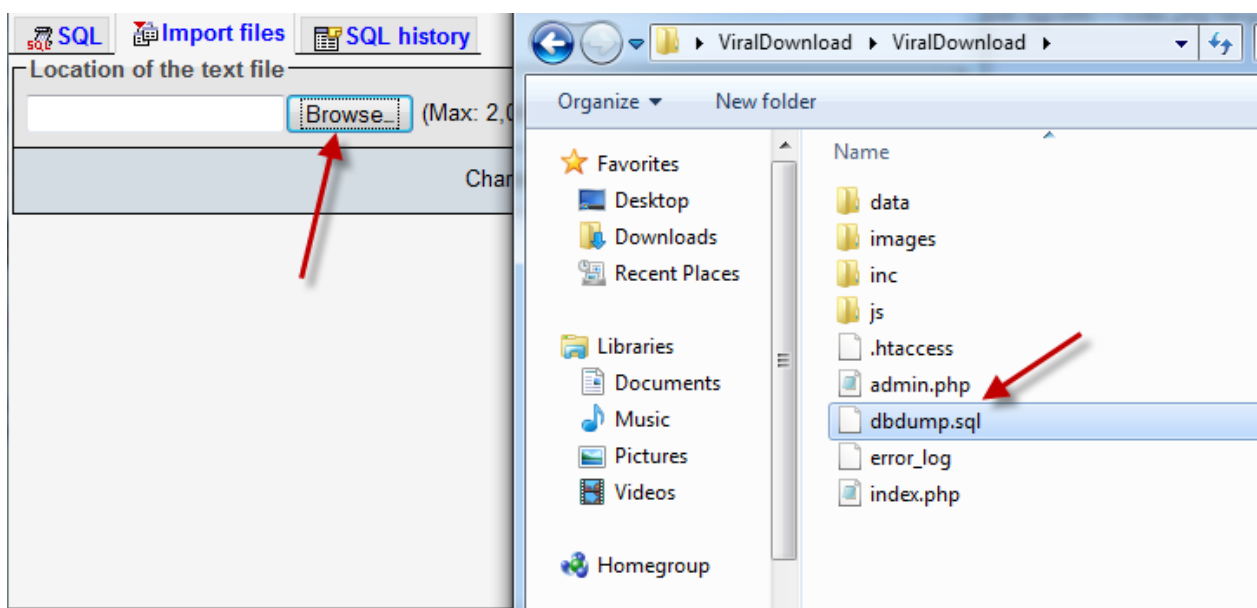

Click on the SQL icon.

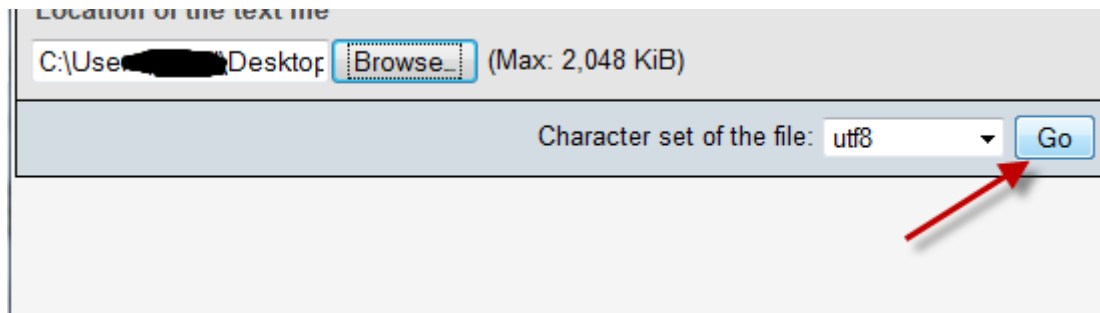

Click on Import files.

Click on Browse and select the dbdump.sql file from the Viral Script's folder.

Click on Go and you're done. Now you can proceed to the next step.

Step 5. Go to the Viral Script's Folder.

Click on: Data > dbconfig.php and fill in you MySQL details.

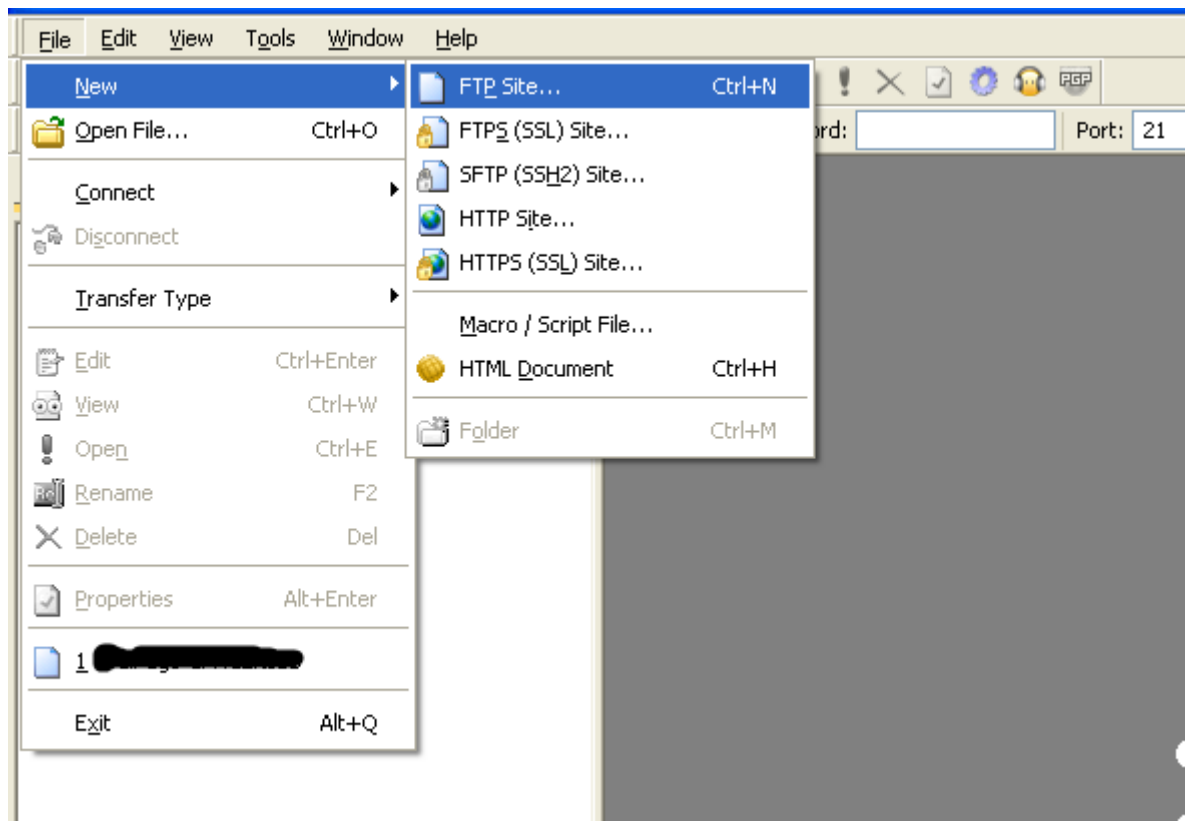

A screenshot of a Notepad window titled 'dbconfig.php - Notepad'. The window has a menu bar with 'File', 'Edit', 'Format', 'View', and 'Help'. The text area contains the following PHP code:

```
<?PHP
define ("DBHOST", "localhost");
define ("DBNAME", "viralpage");
define ("DBUSER", "viralpage");
define ("DBPASS", "your password");
?>
```

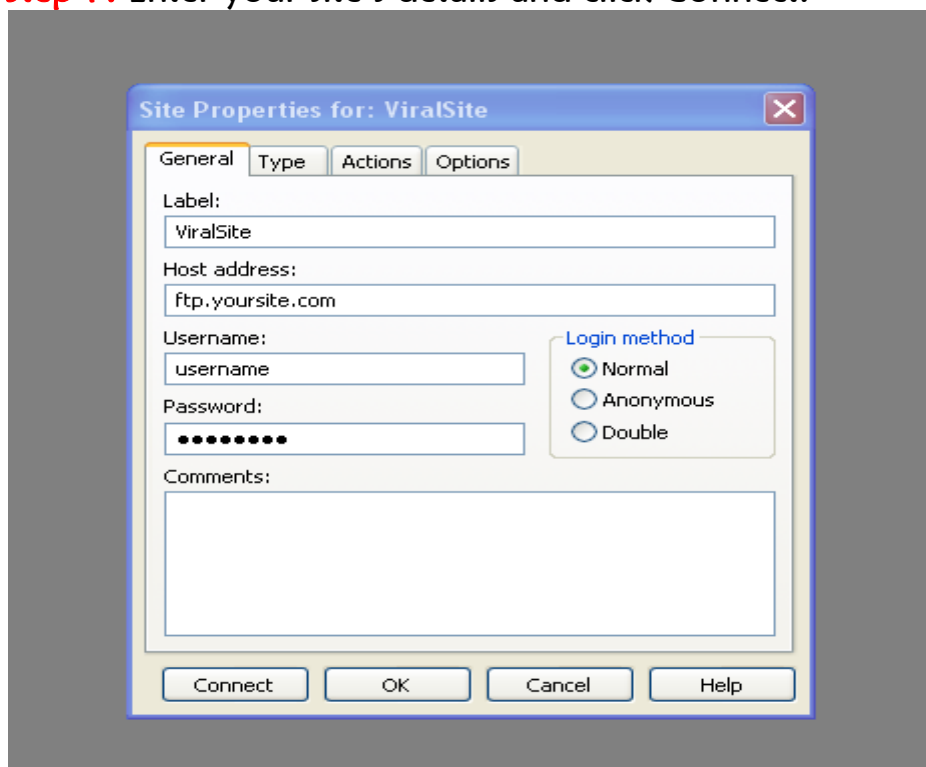

Save the notepad file and proceed to the next step.

Step 6. Next you have to upload the files on your server.

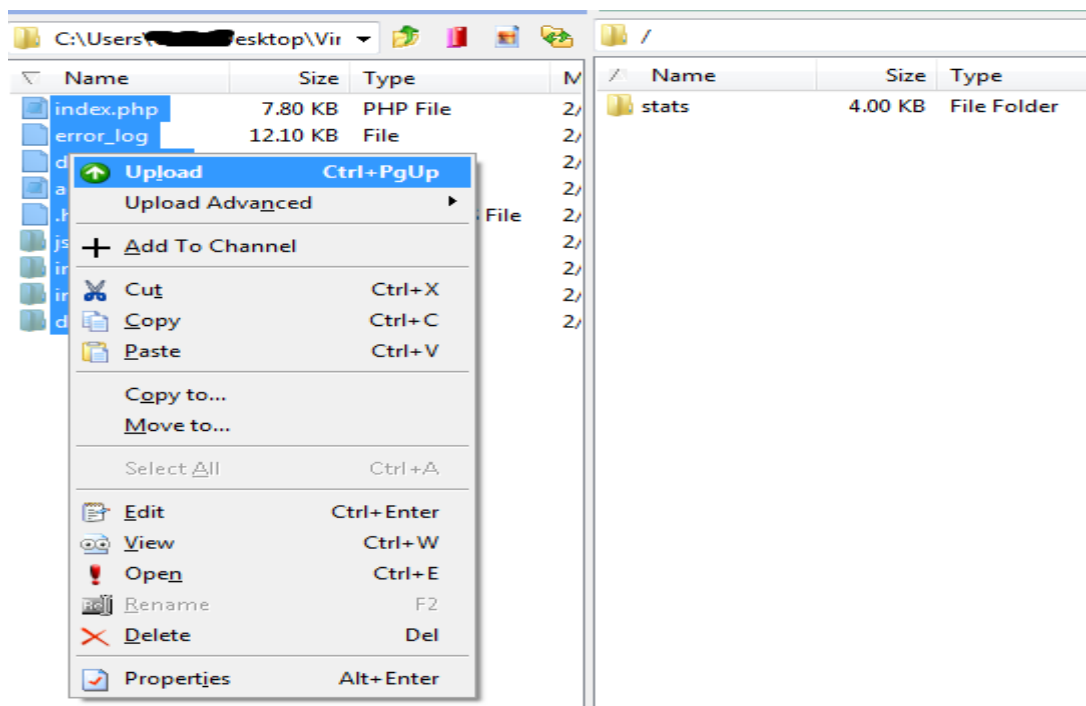

Open CuteFTP and go to: File> New> FTP Site...

Step 7. Enter your site's details and click Connect.

Step 8. Select the script's files and upload them to your server.

Step 9. Once you've done that, go to:

<http://yoursite.com/giveawayfolder/index.php>

The page should look like this:

"Giveaway Of The Day"

Only The Best Freebies, Every Day!!!

OR

"Giveaway Of The Week"

Only The Best Freebies, Every Week!!!

OR

"Giveaway Of The Month"

Only The Best Freebies, Every Month!!!

What Is Giveaway Of The Day/Week/Month?
