

Instant Social Image User Guide

Installing The Plugin

To install the plugin, go to Plugins >> Add New

Upload plugin

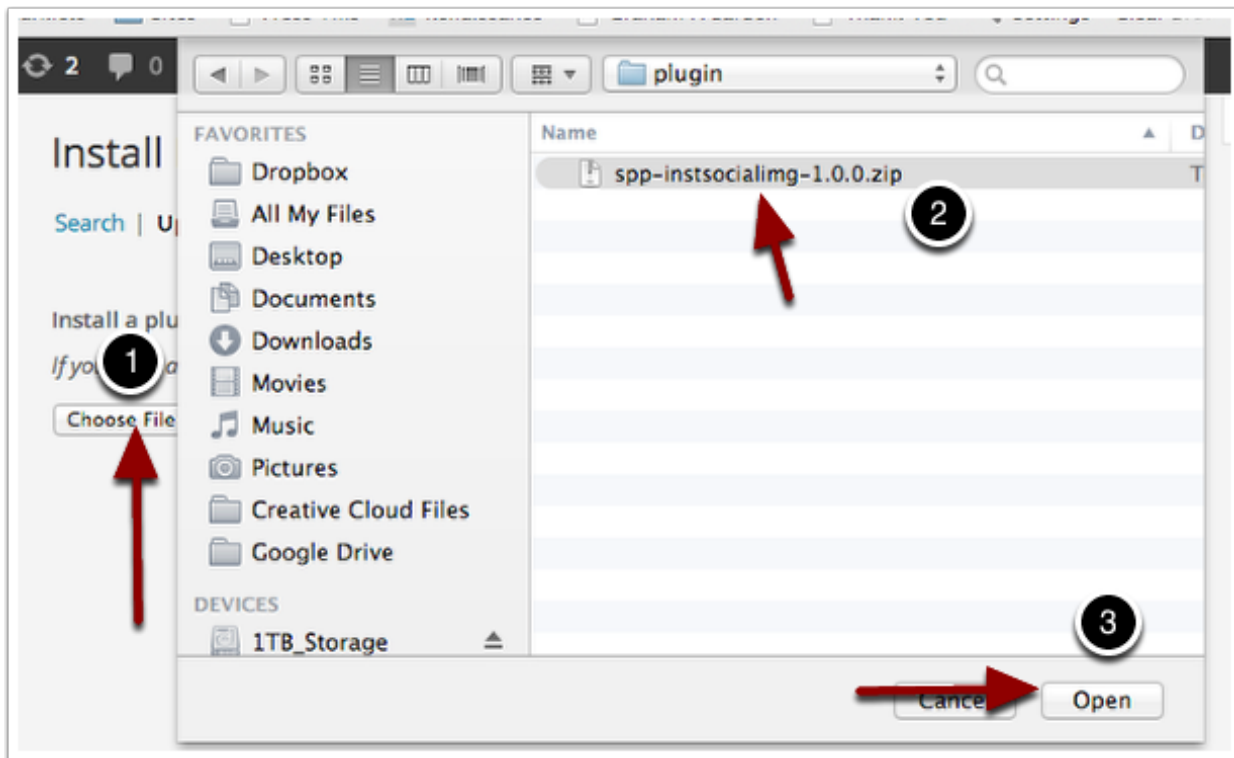

Click Upload

Choose Upload File

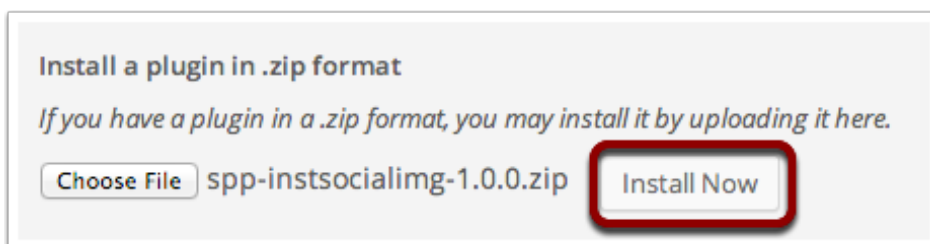

1. Click Choose File
2. Locate the zipped file of the plugin you'd like to install
3. Click Open

Instant Social Image User Guide

Install The Plugin

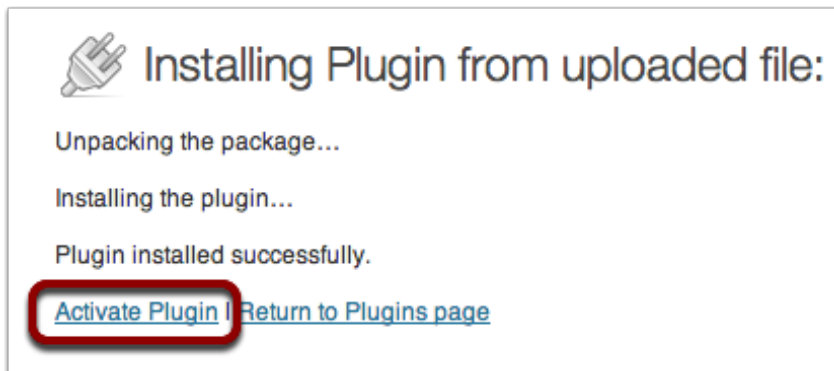

Click Install Now

Activate The Plugin

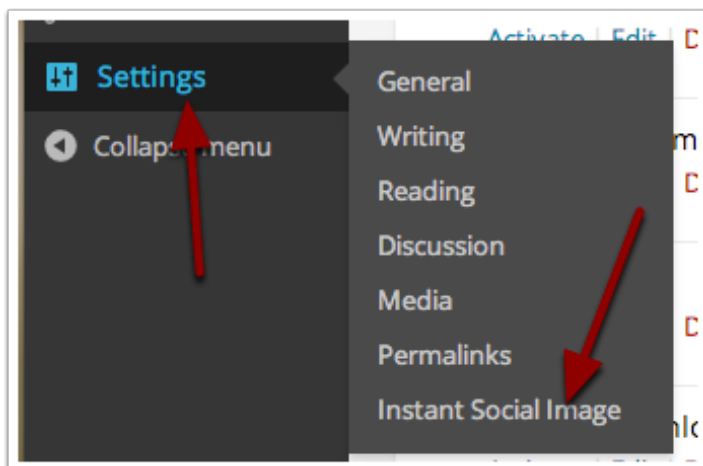

After successfully unpacking and installing the plugin, click *Activate Plugin*.

Instant Social Image User Guide

Set Up Default Settings

Upon installation, you'll find a new menu link under the Settings tab. Click to go to the default settings screen

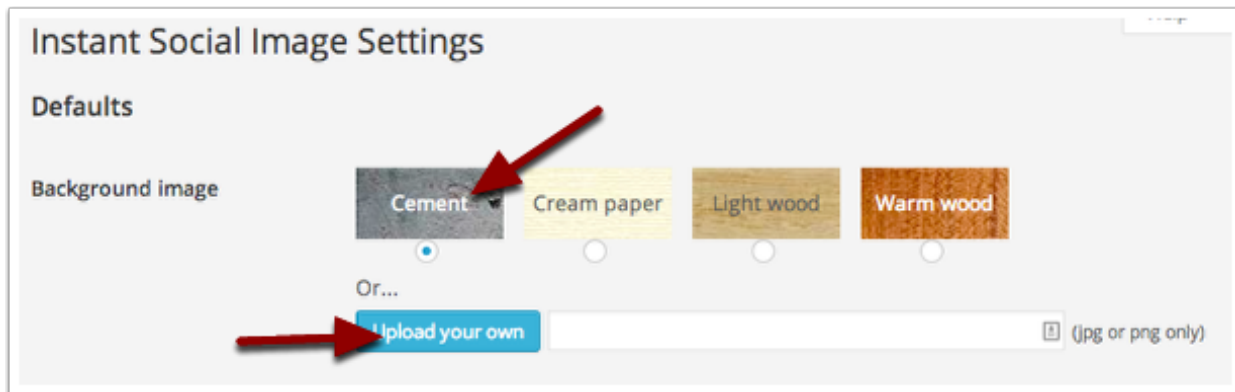

Choose A Default Image

The plugin comes with 4 background images so you can get up and running quickly. You may choose to use one of those by clicking any of the images or radio buttons.

Instant Social Image User Guide

You can also upload your own image. Please use either .jpg or .png images only.

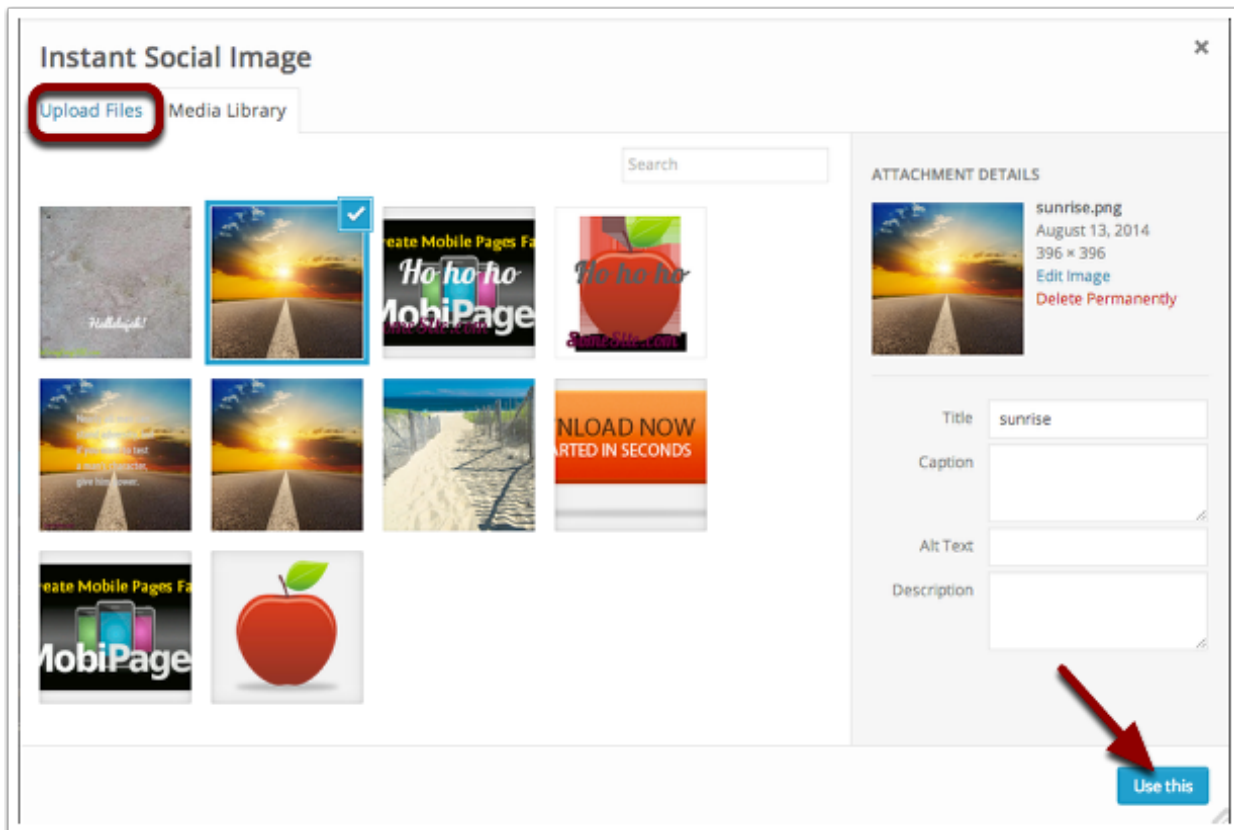

Uploading Your Own Background

If you clicked to upload your own image, this familiar popup will appear. Click on the upload tab to upload just like any other image in WordPress. Alternatively, you can use an image you have previously uploaded to the Media Library.

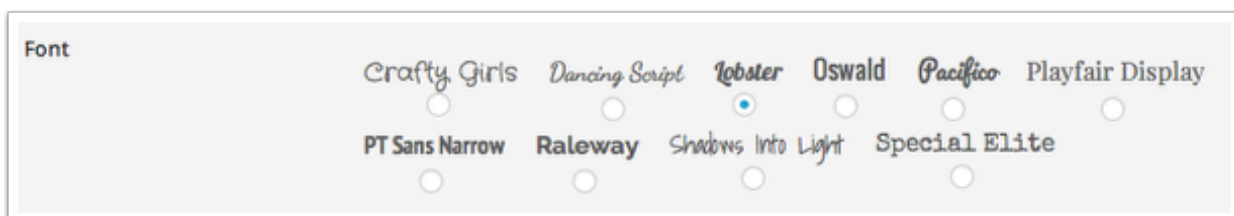

Once you have uploaded or made your selection, click Use this.

Instant Social Image User Guide

Select Default Font

Choose a font you'd like to use in most of your images.

Instant Social Image User Guide

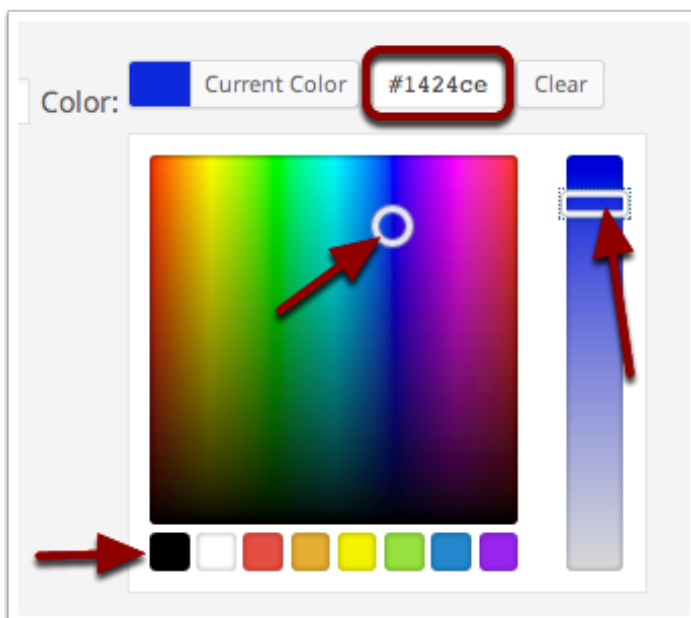

Set Default Text Settings

Set the default text size and choose its color by clicking on Select Color to open the color picker

Using The Color Picker

If you clicked on Select Color previously, a popup with color palette will appear. Use the palette below or choose a color from the square and sliders. You may also enter the color code directly if you know it.

Instant Social Image User Guide

Line Break

Sometimes, your quote text may be rather lengthy. That's when you may need it to stretch wider across the image and reduce the number of lines. By default, the line will break after 25 characters. If your text is longer, you can change the text break to a larger figure.

Line break
Break text after this many characters

Set Default Text Position

By default, the text position is set to the middle so your quote is centered in the image but you may also choose to align it higher to the top or lower to the bottom.

Text position
Top Align: ☐ Middle Align: ☒ Bottom Align: ☐

Default Branding

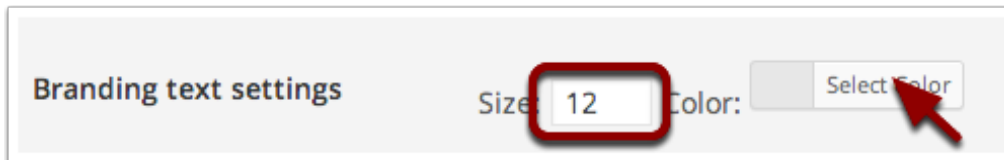

The plugin will automatically add your website's domain name as the branding. You may change this to something else if you wish.

Branding

Instant Social Image User Guide

Branding Text Settings

You can also change the default branding text and color sizes here.

A screenshot of the 'Branding text settings' interface. It features a title 'Branding text settings' on the left. In the center, there is a 'Size' label followed by a text input field containing the number '12', which is highlighted with a red rectangular box. To the right of the size field is a 'Color:' label followed by a color selection button labeled 'Select Color', with a red arrow pointing to it.

Branding Text Alignment

Choose to align your brand text, save changes when you're done.

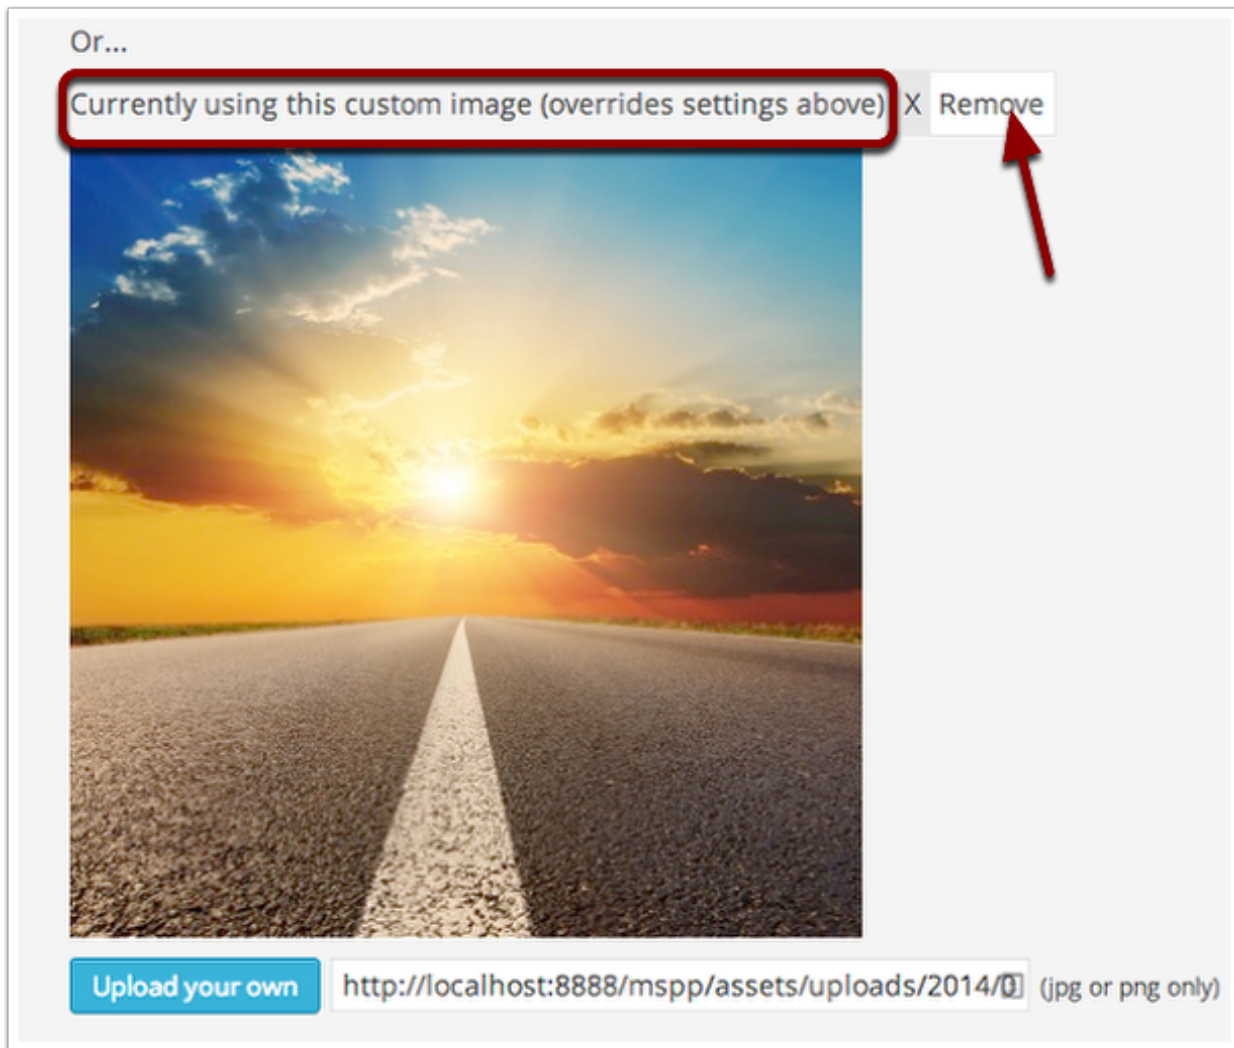

A screenshot of the 'Branding text align' interface. It has a title 'Branding text align' on the left. To the right, there are three radio button options: 'Left:', 'Center:', and 'Right:'. The 'Left:' option is selected, indicated by a blue dot and a red arrow. Below these options is a blue 'Save Changes' button, with a red arrow pointing to it.

Default Custom Background

If you uploaded a custom image for your default background, you will see a notice with option to remove after saving.

To remove the custom image, simply click Remove.

Instant Social Image User Guide

Save After Removing

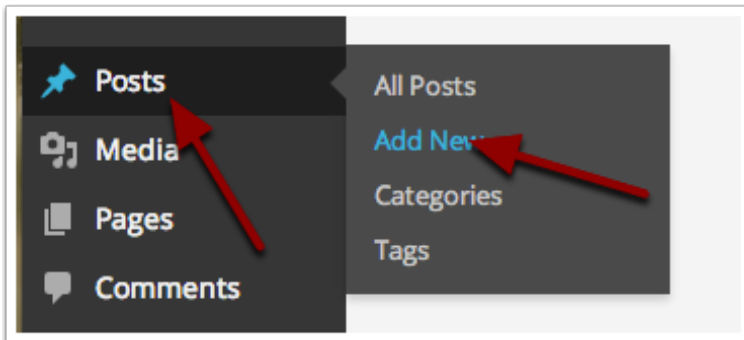

Remember to save your settings after removing for it to take affect.

Instant Social Image User Guide

Begin Creating Social Images

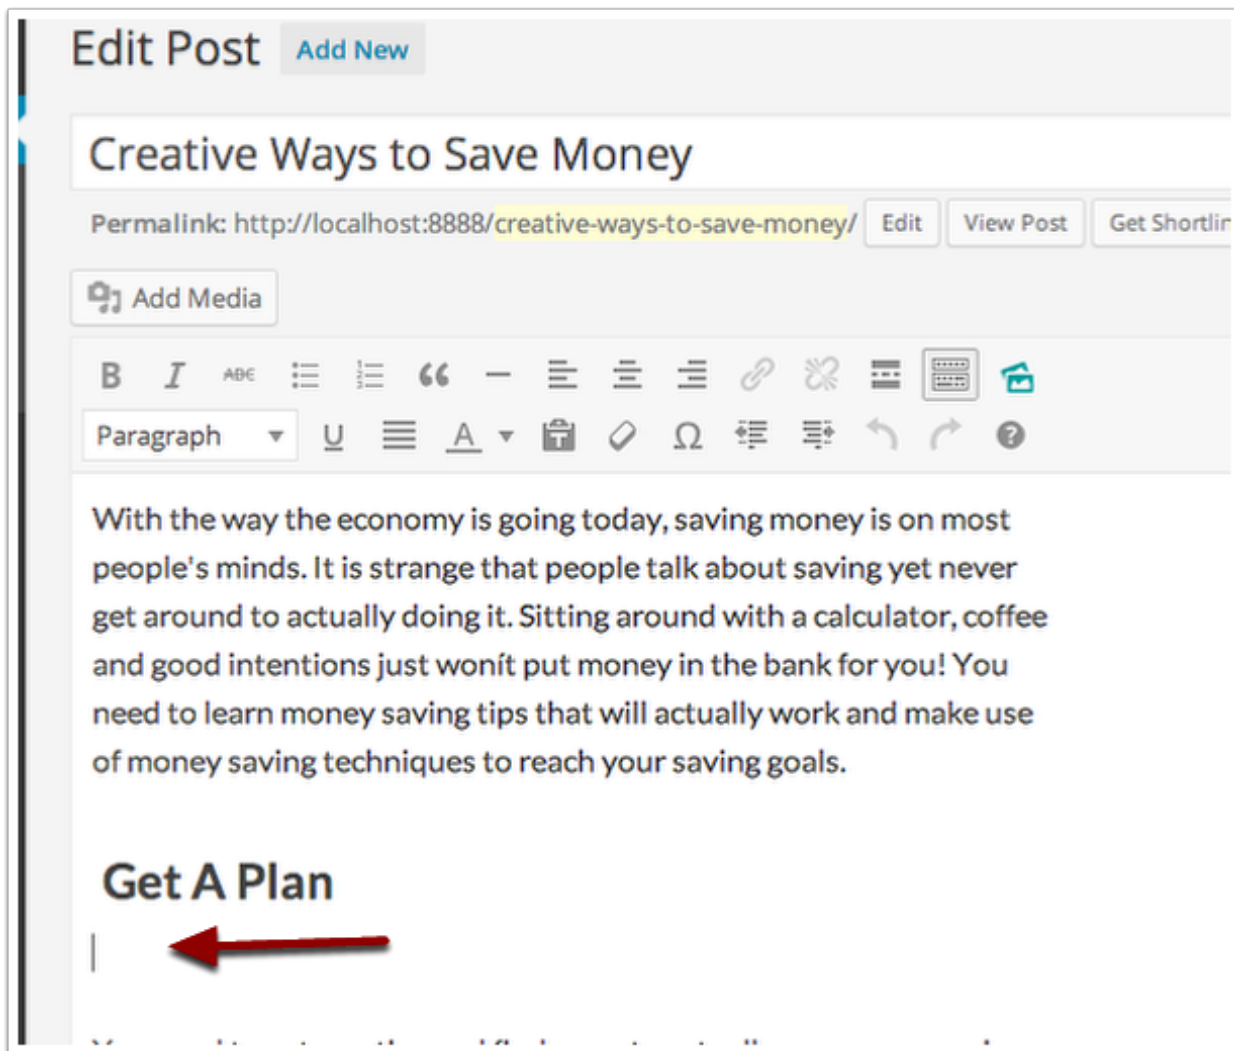

To create social images, go to Posts >> Add New. You may also edit a post, edit a Page or create a new Page.

Decide Where To Place Image

Before creating an image, it would be a good idea to place the cursor where you want to insert the image in your post.

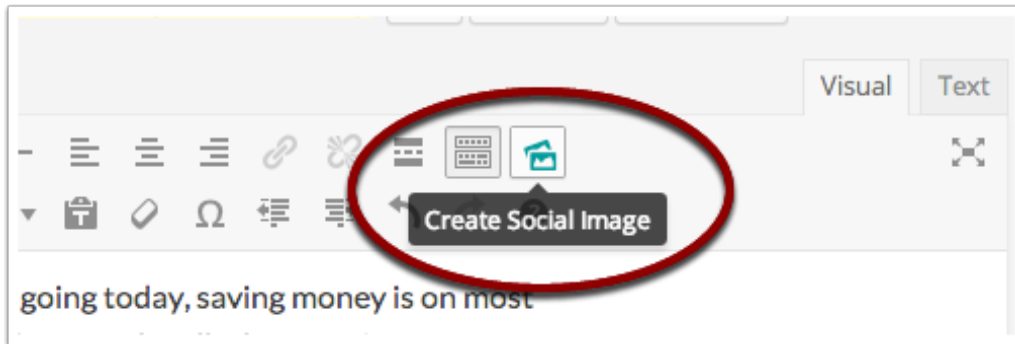

Instant Social Image User Guide

Create Social Image Button

Next, locate and click on the blue Create Social Image button

Instant Social Image User Guide

Create Social Media Popup

A popup will appear. All the default settings will also appear here so if you wanted to quickly create an image without further editing, simply enter the text and click Create Image

Instant Social Image User Guide

The screenshot displays the 'Instant Social Image' application window. It features a sidebar on the left with options like 'Use default background' (checked), 'Override default image' (with an 'Upload new' button), and 'Text on image'. The main area shows a preview of a yellow background with the text 'If there is no struggle, there is no progress. - Frederick Douglass'. Below the preview, there are font selection options (Crafty Girls, Dancing Script, **Lobster**, Oswald, Pacifico, Playfair Display, PT Sans Narrow, **Raleway**, Shadows Into Light, Special Elite) and text options (Size: 22, Color: Select Color). Text alignment options (Top Align, **Middle Align**, Bottom Align) are also present. Branding options include a text field (demosite.com), size (12), and color (Select Color). Branding text alignment options (Left: **Center**, Right) are at the bottom. A red arrow points to the 'Create Image' button, which is labeled with a circled '2'.

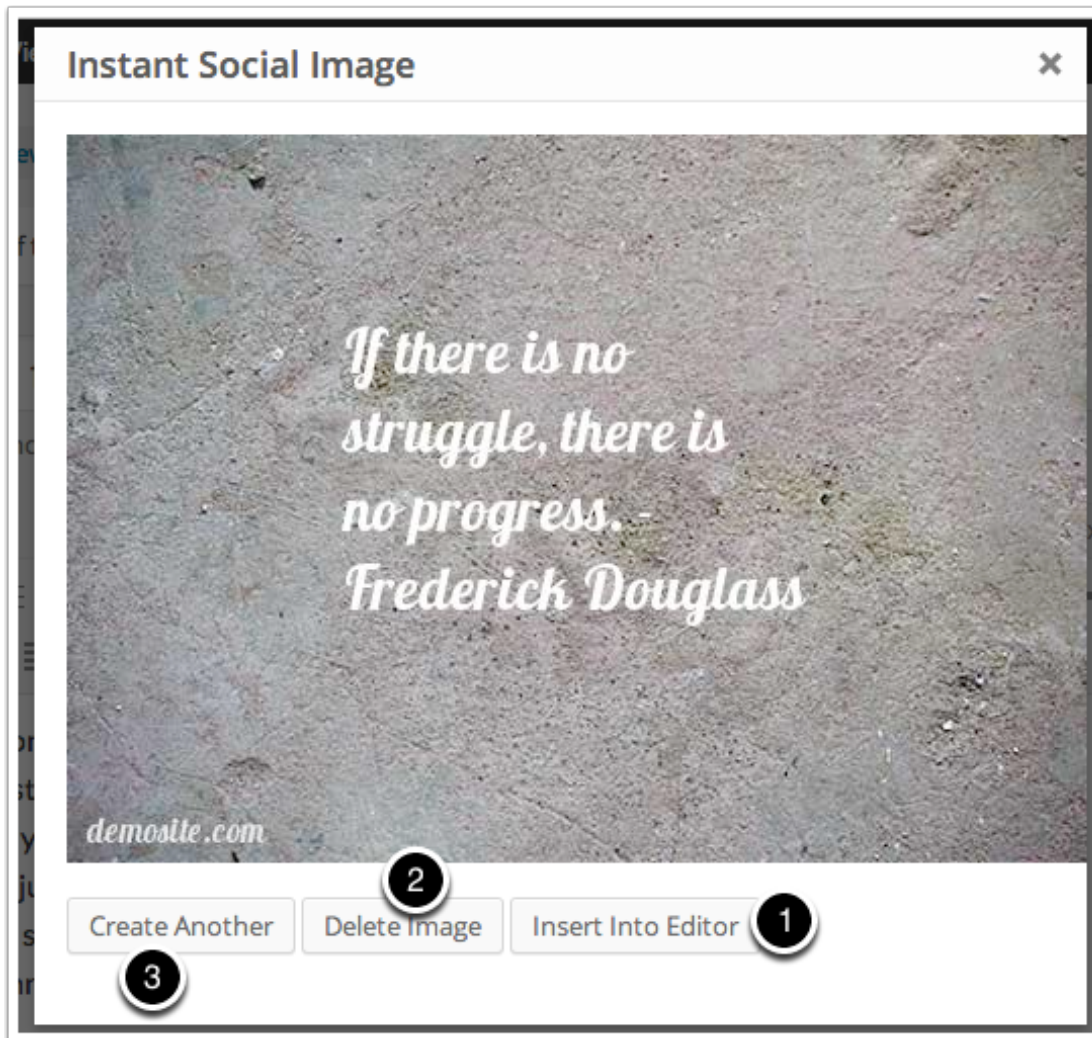

Quick Image Creation Results

Just one paste and a click, here are the results.

1. You can either choose to delete the image or Insert Into Editor.

Instant Social Image User Guide

2. If you are unhappy with the image or wish to change it, we highly recommend that you click Delete Image. This way, the image gets deleted from your Media Library and won't clutter it up or take up space on your website.
3. If you'd like to keep it but not insert, click Create Another

Create Another

If you choose to delete or create another, the popup screen will return to this. From here, you can edit any of the options available to you.

1. Override the default background and use a new image
2. Change the text
3. Change the font

Instant Social Image User Guide

4. Change text size and/or color
5. Change when line break should occur
6. Change text position
7. Change the branding
8. Change brand text size and/color
9. Change brand text alignment

Once you are satisfied with your changes, click Create Image

The screenshot shows the 'Instant Social Image' interface with the following elements and numbered callouts:

- 1:** 'Upload new' button for overriding the default image.
- 2:** Text input area for 'Text on image'.
- 3:** Font type selection, with 'PT Sans Na' highlighted.
- 4:** Text size and color selection (Size: 20, Color: black).
- 5:** Line break setting (Break text after this many characters: 25).
- 6:** Text alignment selection (Top Align, Middle Align, Bottom Align).
- 7:** Branding text input (demo.com).
- 8:** Branding text size and color selection (Size: 10, Color: black).
- 9:** Branding text alignment selection (Left, Center, Right).
- 10:** Font type selection, with 'Crafty Girls' highlighted.

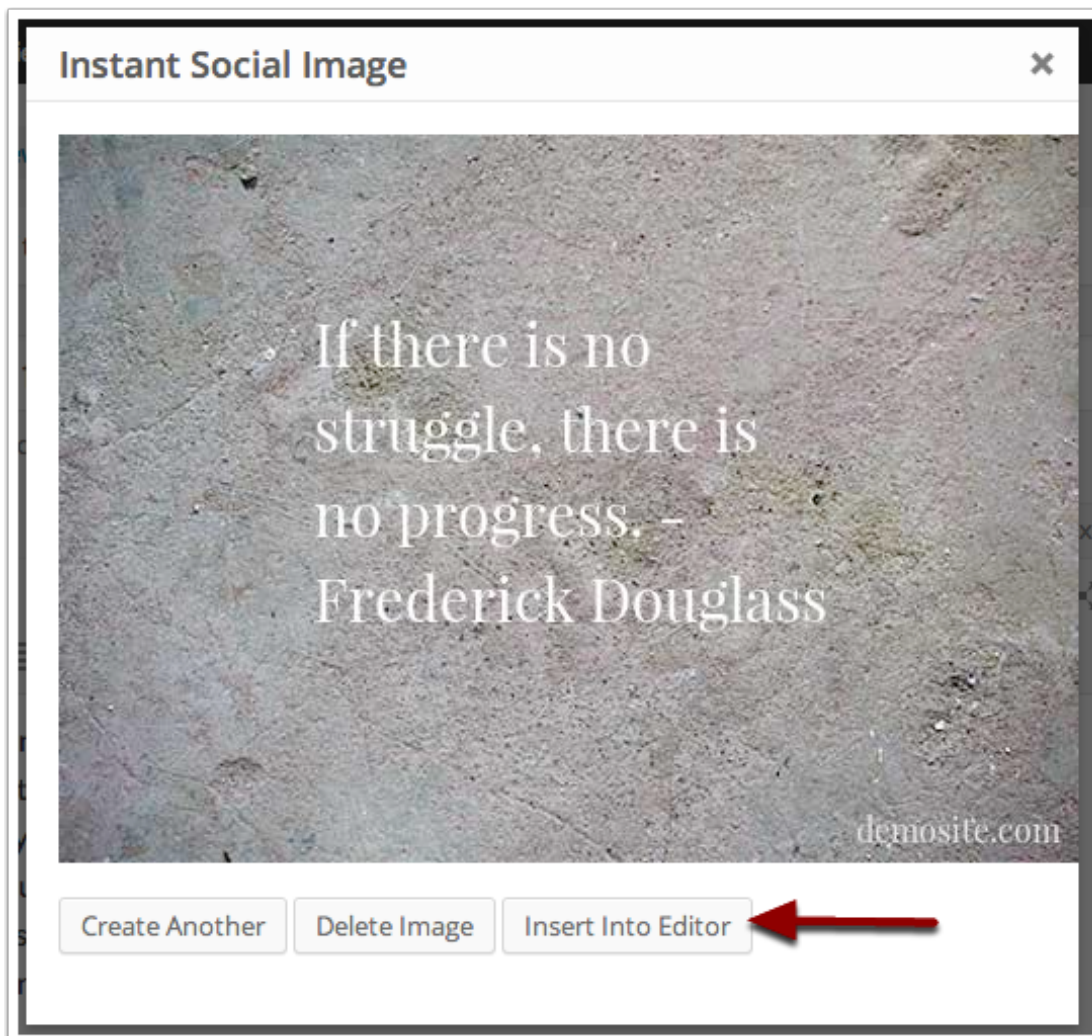

A red arrow points to the 'Create Image' button at the bottom.

Instant Social Image User Guide

Changed Image Result

We opted to simply change the font and brand text alignment. This is the result.

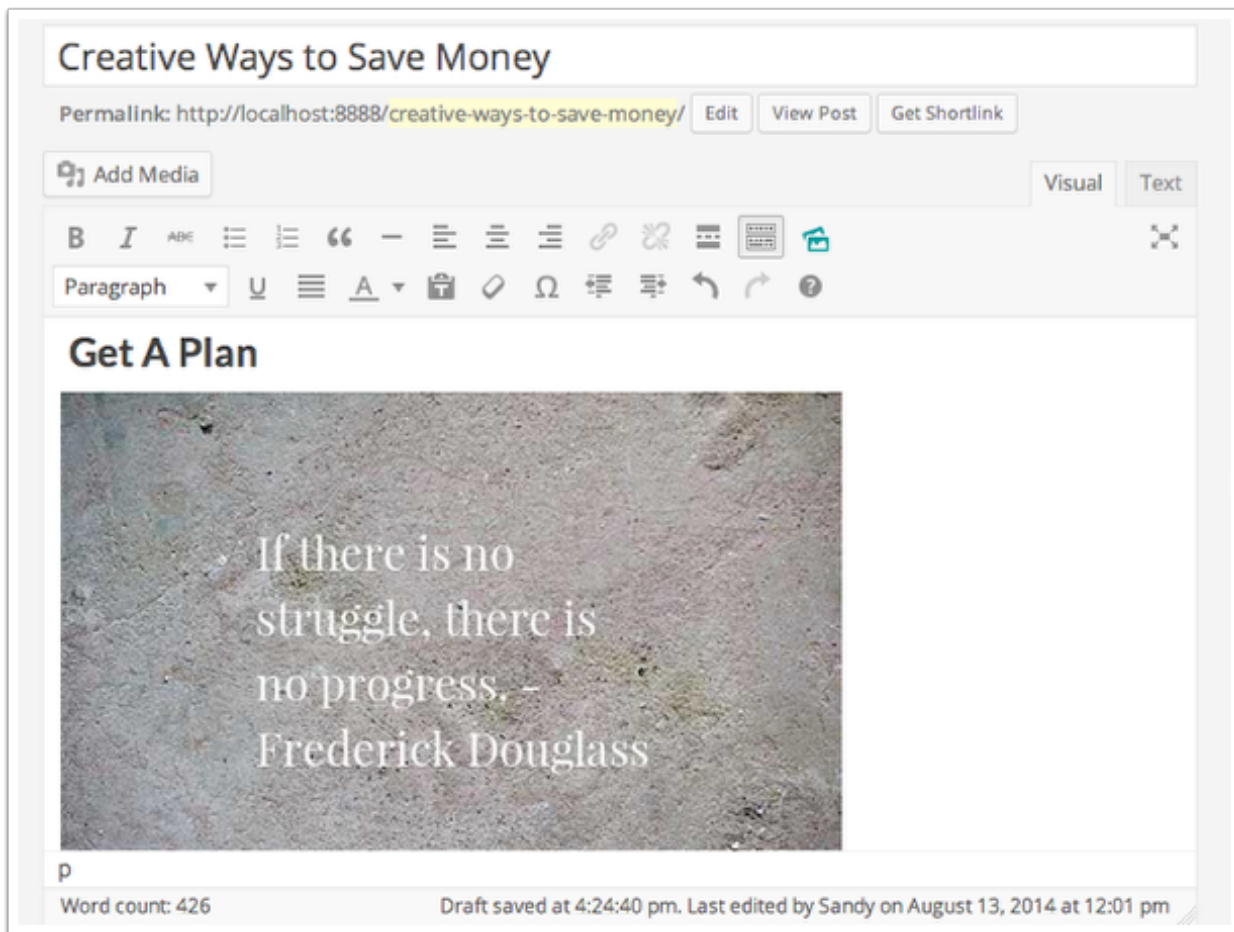

If you're happy with this and would like to use this image, click Insert Into Editor

Instant Social Image User Guide

Image Inserted Into Editor

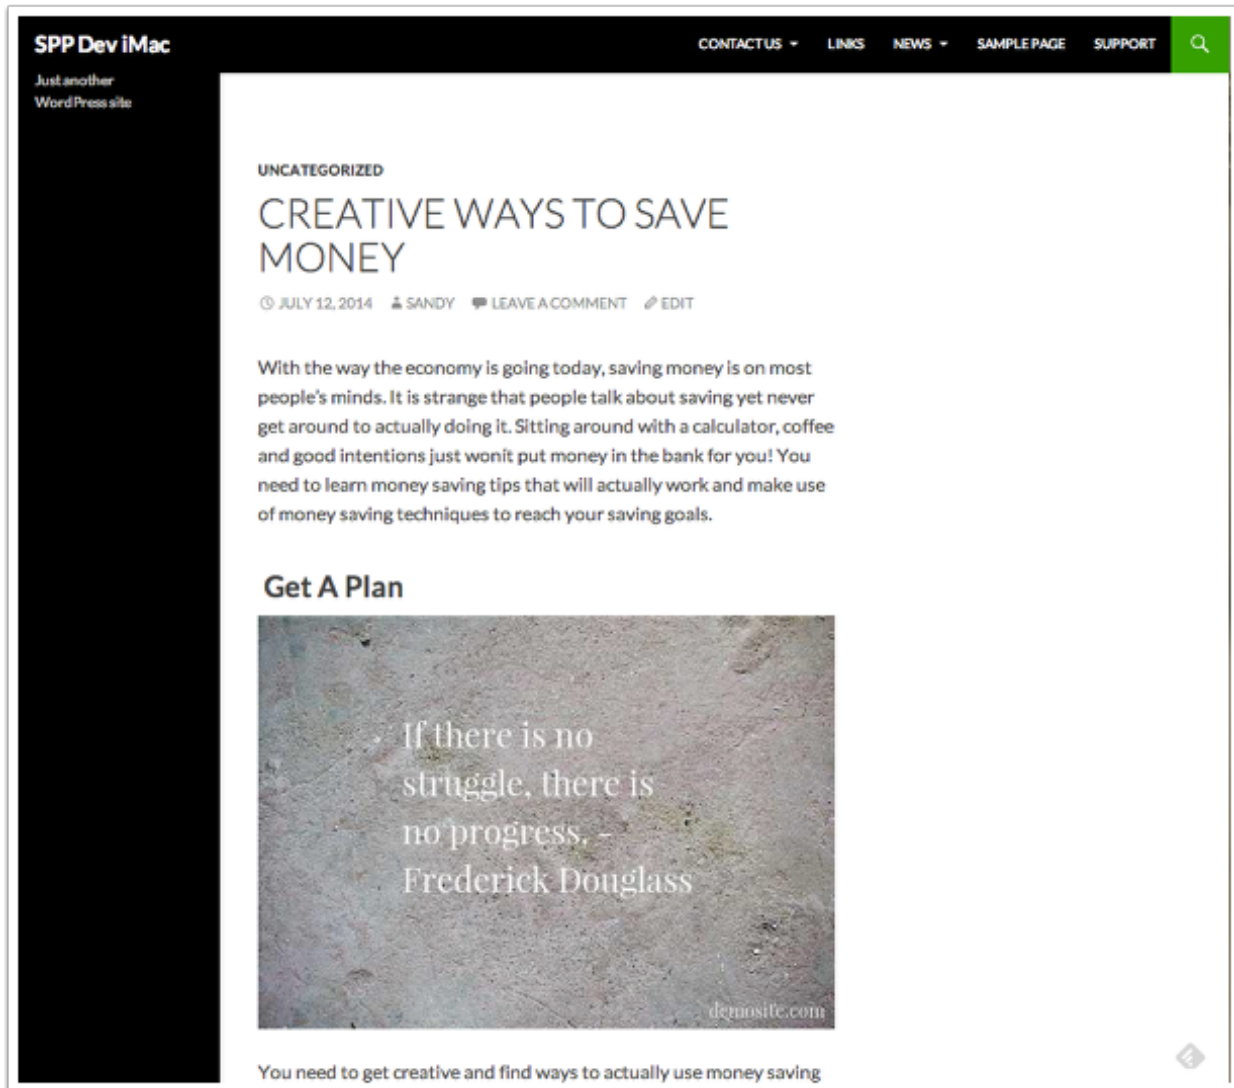

The image will be inserted where you put your cursor earlier and the popup disappears.

Saved Post

Here's what the image looks like in the saved post.
