Permalink: http://localhost/sppdev/spp_slideup/slider-2/ [Edit](#) [View SlideUp](#)

SlideUp Text

In the Visual Editor, enter the text for your SlideUp like you would any post or page. Remember, this is an ad. So keep your message short and to the point with a strong call to action.

SlideUp Type

Choose the type of SlideUp panel you want to create. Ad/Content is purely text, images and links. Anything you put in the visual editor above.

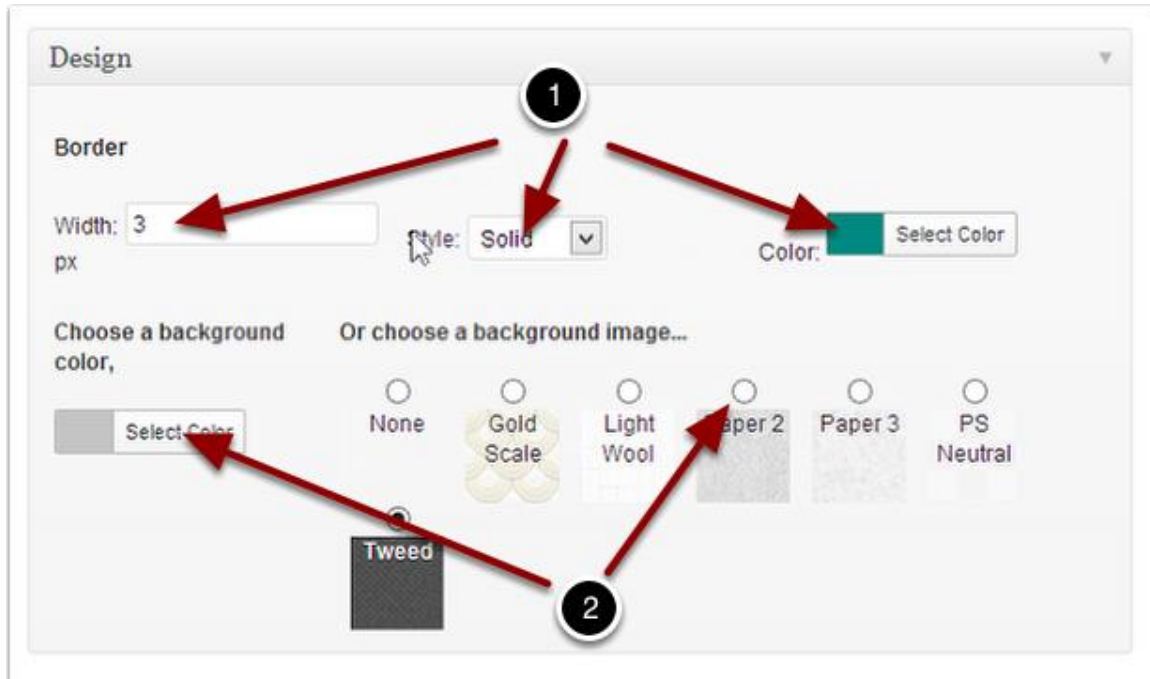

Opt-in type displays text from the visual editor and an opt-in form below it.

Social type displays text from the visual editor and your choice of social profile icons below it.

SlideUp Design

Here, you get to customize how you want your SlideUp panel to look.

1. To add a border, enter a width, style and select your color. Choosing None for style will disable the border.
2. You can choose a background color or background texture image. If you choose an image, the color will not be shown.

Autoresponder Code: When Using Opt-in Type

This only applies when you choose Opt-in type.

Paste your optin form code in here. Be sure to copy and paste. Typing in will not work. The plugin works best with raw HTML form codes generated by most autoresponder companies and solutions like Aweber, GetResponse, 1ShoppingCart or Autoresponse Plus. Many WordPress newsletter plugins use shortcodes or ajax technology which will not work here.

Optin form code	<pre><form method="post" class="af-form-wrapper" action="http://www.aweber.com/scripts/addlead.pl" ta <input type="hidden" name="meta_web_form_id" value="1315276119" /> <input type="hidden" name="meta_split_id" value="" /> <input type="hidden" name="listname" value="techtraininghal" /> <input type="hidden" name="redirect" value="http://www.aweber.com/thankyou-coi.htm?m=video" /> <input type="hidden" name="meta_adtracking" value="TBThome" /> <input type="hidden" name="meta_message" value="1" /> <input type="hidden" name="meta_required" value="name,email" /> <input type="hidden" name="meta_forward_vars" value="" /> <input type="hidden" name="meta_tooltip" value="" /></pre>
If your optin form doesn't work as expected, view autoresponder code to check.	

Check Your Autoresponder Form Code

It is of utmost importance the key pieces of your form code you pasted in the step before, gets copied into the next 4 fields:

1. Name field
2. Email field
3. AR Post URL
4. Hidden fields

If all four fields are empty, delete and paste it into the Optin form code field above again.

(Optional) If you are a bit more technical, be sure the field names correspond with the fields in your form. This should be the first troubleshooting step if your form doesn't work.

Also, if your form code only has email fields, make sure the Name Field is empty. Sometimes the script tends to enter the email field name into the name field in such cases.

Optin

Paste Your Autoresponder Code:

```
<form method="post" class="af-form-wrapper"
action="http://www.aweber.com/scripts/addlead.pl"
target="_new" >
<input type="hidden" name="meta_web_form_id"
value="1315276119" />
```

Name Field:

Email Field:

AR Post URL:

Hidden Fields:

```
<input type="hidden" name="meta_web_form_id"
value="1315276119"><input type="hidden"
name="meta_split_id" value=""><input type="hidden"
name="listname" value="techtraininghal"><input
type="hidden" name="redirect"
```

Autoresponder Form Labels

If you want to change the text of your form labels and submit button,

1. Enter your own text in Name Field Label
2. Enter your own text in Email Field Label
3. Enter your own text in Button Label

Name Field Label:
Text that appears in the name field

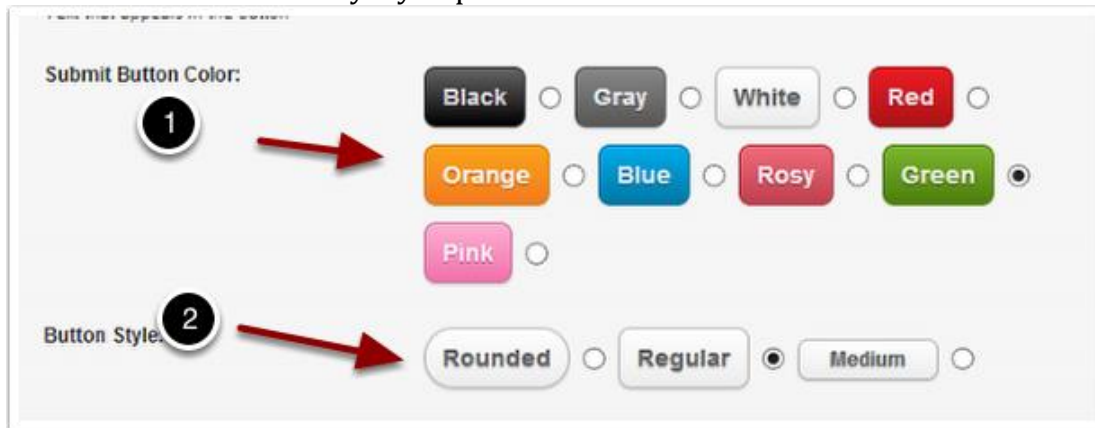

Email Field Label:
Text that appears in the email field

Button Label:
Text that appears in the button

Autoresponder Submit Button Color

You can also change the color of your submit button to suit your design.

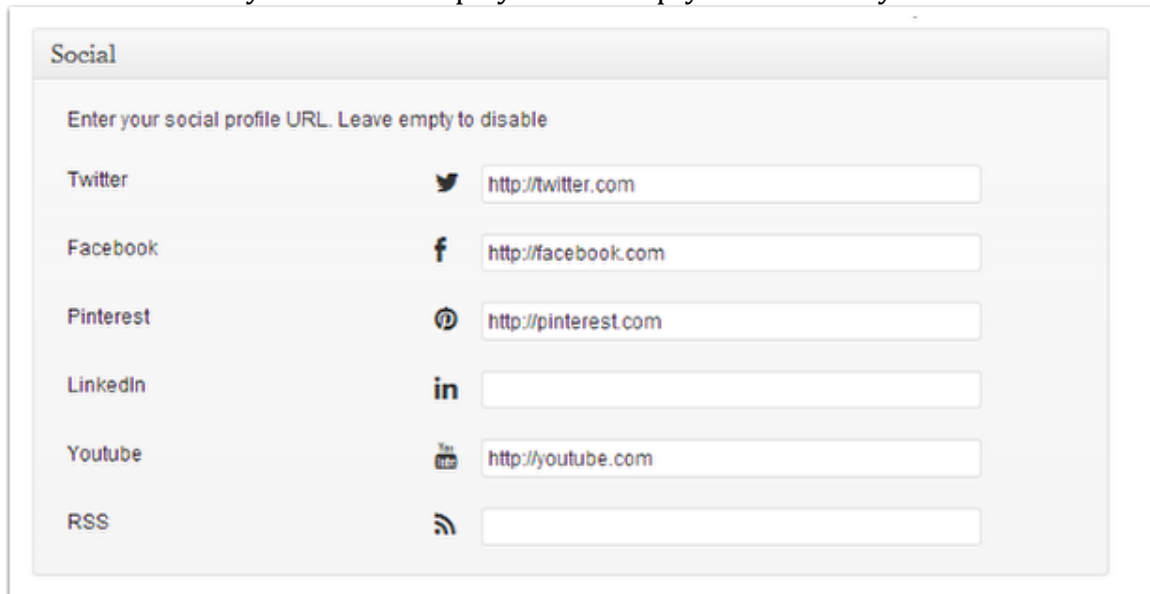

1. Click the button color you prefer.
2. Click the button style you prefer.

The screenshot shows a settings panel for the autoresponder submit button. It has two sections: 'Submit Button Color' and 'Button Style'. In the 'Submit Button Color' section, there are ten color options: Black, Gray, White, Red, Orange, Blue, Rosy, Green, Pink, and a selected option (indicated by a radio button). In the 'Button Style' section, there are three style options: Rounded, Regular (selected), and Medium. Red arrows point from numbered circles (1 and 2) to the 'Orange' color and 'Regular' style options respectively.

Social Profile URLs : When Using Social Type

This only applies when you choose Social type. Enter the URL to your social profile for each network you want to display. Leave empty for the ones you want to disable.

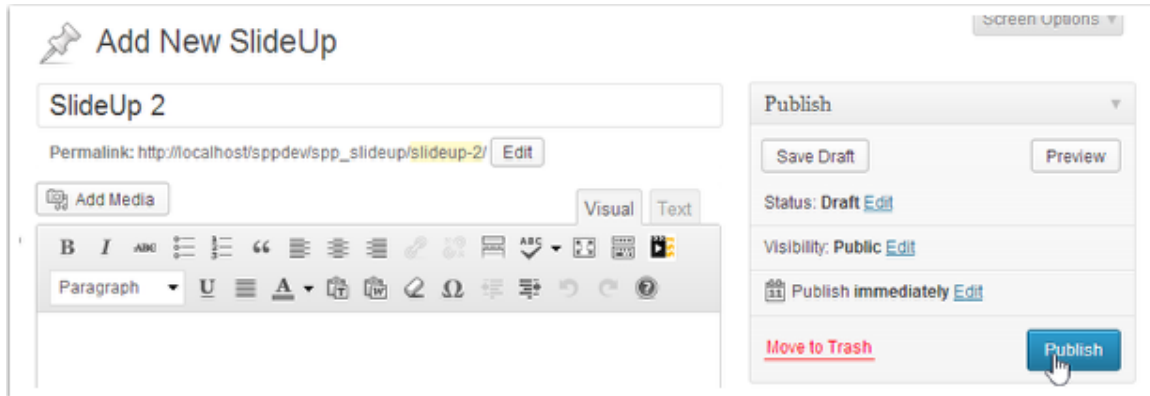

The screenshot shows a settings panel titled 'Social'. It contains a heading 'Enter your social profile URL. Leave empty to disable'. Below this are six rows, each for a different social media network: Twitter, Facebook, Pinterest, LinkedIn, Youtube, and RSS. Each row has a small icon of the network and a text input field for the URL. The input fields for Twitter, Facebook, and Youtube contain the default URLs: http://twitter.com, http://facebook.com, and http://youtube.com respectively. The input fields for LinkedIn and RSS are empty.

Publish SlideUp Panel

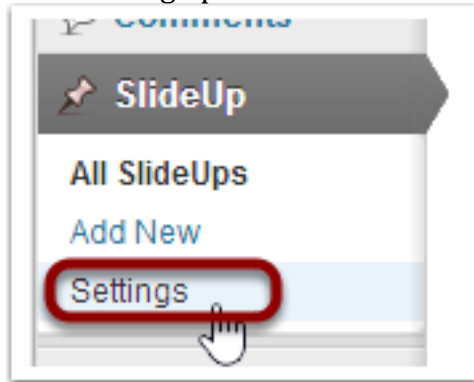

Once you are happy with your content, design and options, click the Publish button.

*Note: You may not be able to view your panel from here even though WordPress gives you options to do so.

Edit Settings

After setting up at least one SlideUp panel, go to Settings.

Settings Options

Set up your defaults.

1. Default SlideUp for Posts and Pages
2. Default SlideUp for your home page
3. Default SlideUp for Archive pages
4. Choose how you want your SlideUp to appear
5. If using delay method, enter number of seconds here
6. Enter cookie length. Default is 14 days. This means, if someone clicks to close the SlideUp panel, all of your panels will be disabled for that person for the next 14 days. If you are testing or you choose to disable cookies, enter 0 here.

Important! You must save your settings at least once before any of your SlideUp Panels will display!

Disabling A SlideUp Panel For Selecting Pages or Posts

On posts or pages where you do not want the SlideUp to appear, navigate to the Pages (or Posts) list, click on the Page (or post) you want to disable the popup for.

Check To Disable SlideUp

On the right side of the Page (or post) edit screen, scroll down till you see the Check to disable SlideUp for this post. Check the box, then, update your page. The SlideUp panel will no longer display for this Page (or post).

SlideUp

Check to disable SlideUp for this post ☐

Select SlideUp

Publish

Exclusive SlideUp For Post or Page

You also have the option to create an exclusive SlideUp just for this post or Page. Simply click the drop down in each post or page and select the one you wish to use.
