

Linked In App Setup Guide

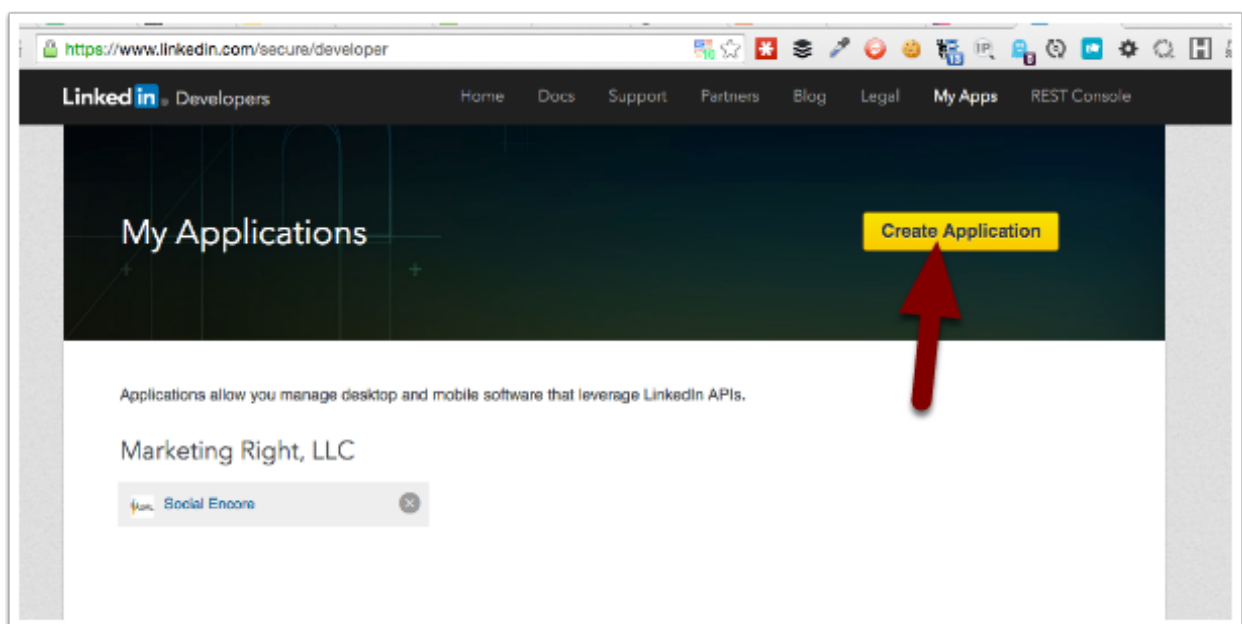

This document walks you through how to set up a LinkedIn app to obtain app ID's and secret keys required for plugin use.

Developer at LinkedIn

Start by visiting LinkedIn for Developers. <https://www.linkedin.com/secure/developer>

Click Create Application

*Note: If you've never created a LinkedIn application before you may be asked to submit information about your company before you can create the application.

Create Your Application

1. Enter a name for your app
2. Enter a description for your app
3. Enter a logo for your app (or use your website logo)
4. Choose the most appropriate use for your application

Linked In App Setup Guide

5. Enter your website URL
6. Enter your email address
7. Enter your phone number
8. Click the box to agree to the terms

Submit the form.

Create a New Application

Company Name: *

Marketing Right, LLC

Name: *

Plugin Mill Apps

Description: *

WordPress plugin access

Application Logo URL: *

https://pluginmill.com/wp-content/uploads/PluginMillLogo.gif

Application Use: *

Content Distribution Site

Website URL: *

http://www.pluginmill.com

Business Email: *

youremail@yourdomain.com

Business Phone: *

(123) 987 456123

☒ I have and agree to the [LinkedIn API Terms of Use](#).

Submit **Cancel**

Linked In App Setup Guide

Retrieve Authentication Keys

You will now be presented with the application ID and secret. Copy these into the plugin.

Note: Depending on your plugin, you may not be done configuring yet. Please return to your plugin user guide for further instructions to complete the setup process.
