## Introduction

In case you haven't heard of it, let me explain what [Fiverr.com](https://www.fiverr.com) is and how it works.

Fiverr is a micro-outsourcing site. Sellers or outsourcers offer a whole list of services, called gigs, for just \$5. Clients then buy these gigs for \$5 using their credit card or, more usually, Paypal.

Most small business owners, and internet marketers are no exception, do everything themselves. This is hugely limiting as there are only so many productive hours in any one person's day.

This is a huge obstacle to business success, an obstacle that many never overcome. Some, however, think about leveraging the skills of others and they then turn their attention to outsourcing.

The problem then becomes that you can spend a lot of time trying to find quality outsourcers.

In this Module, we've looked at Fiverr.com and have done all of the work for you.

For every sub-category under every category on Fiverr relevant to an information product business we have looked for sellers who have at least a 95% personal rating, where the specific gig has at least a 95% rating.

Furthermore, wherever possible, we have focused on Fiverr's elite, the 'Top Level sellers'. Where there aren't enough of these, we've also included 2nd level sellers.

Outsourcing is a great way of freeing up your time and saving money and Fiverr is a great place to start outsourcing as it only costs you \$5 a gig!

From a practical perspective, I recommend that when you are looking for a gig provider on Fiverr, you should select more than one and see which one delivers the results you like most.

Outsourcers have different experience levels, knowledge and skill, so results will vary.

I would also suggest that you think carefully about which tasks to outsource to Fiverr. Some tasks are better for a \$5 supplier than others!

Finally, inclusion in this Rolodex does not imply that I am endorsing any one outsourcer.
