Hi there,

All templates are in .zip file format. You must unpack them first. If you do not have any file compression software, get one now:

http://www.winzip.com/

To edit templates, you need good text editor. We strongly recommend 100% FREE Notepad++.

http://notepad-plus-plus.org/

Customization process:

1. **Unpack** a template

2. Right-click on **index.html** file

3. **Edit** with Notepad++

4. Look for **text in green**. Those are commented out lines with simple instructions to follow.

5. **Save** the file.

5. **Replace** images. Note: Some images are in .jpg file format and some of them are in .png.

6. **Make Money**!

If you require help with customizations, **WE CAN HELP**. We will customize it to your liking.

You can **outsource the work to us**. We charge **$25** per template only.

Work delivered within 24h – 48h.

Just email us: **info@boxofapps.net**

If you have any questions or comments, please contact us at **info@boxofapps.net**

Thanks for your business!
