How to Use WP Social Widget

This guide assumes that you already have logged in to your wordpress admin area and that **WP Social Widget** has been successfully installed in your wordpress site.

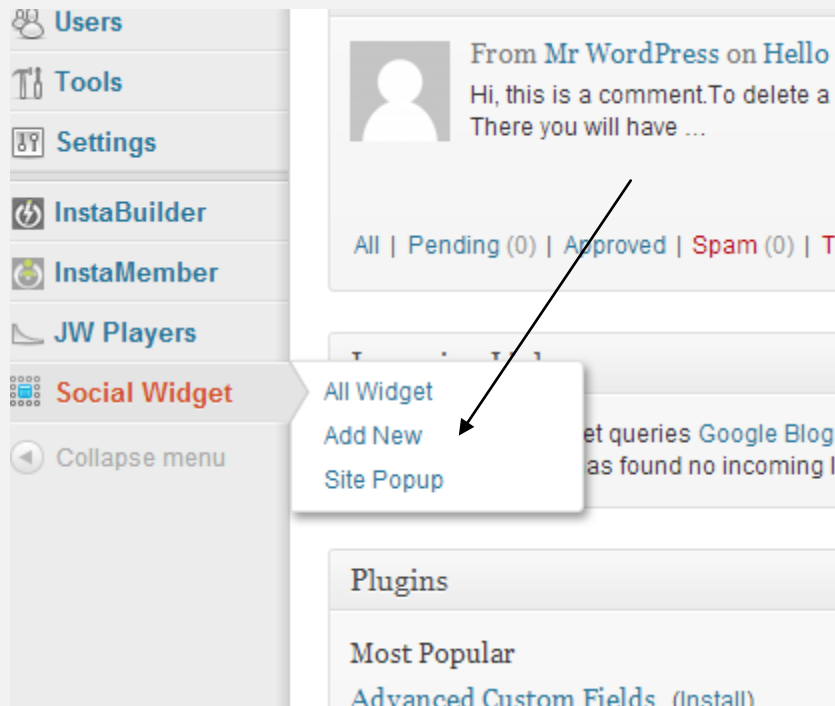

1. Click the **WP Social Widget** menu in your wordpress admin dashboard to start adding social widget contents. .

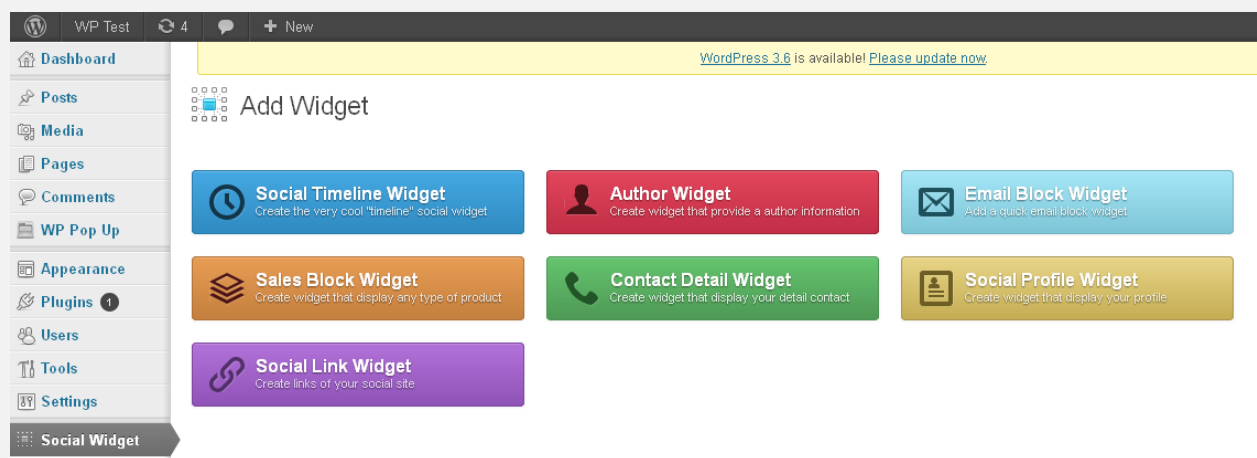

2. Click **Add New**.

Alternatively, you may also hover your mouse on the menu to display the options available, then click **Add New**.

3. Choose the type of social widget you want to create from the 7 different options available for you.

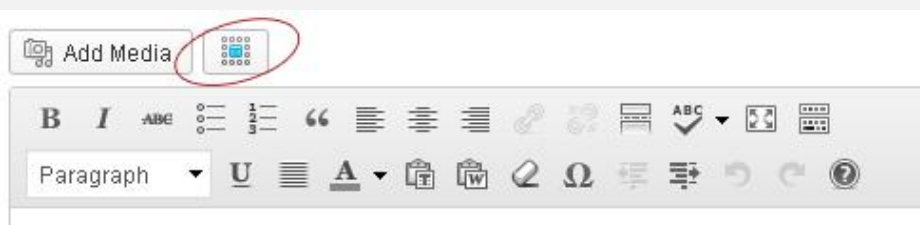

- **Social Timeline Widget** – this is a type of social widget that enables you to create a content similar to that of the current facebook timeline view in 3 different styles.
- **Author Widget** – this is a type of social widget that displays author information or a person's profile in 3 different styles.
- **Email Block Widget** – this is a type of social widget wherein you can display a person or a company's profile with an email link. It offers 3 different styles to choose from.
- **Sales Block Widget** – this is a type of social widget wherein you can display product information as well as a buy now button. It offers 3 different styles to choose from.
- **Social Profile Widget** – this is a type of social widget that enables you to display a person or a company's profile as a content that comes in 3 different styles.
- **Contact Detail Widget** – this is a type of social widget wherein you can display as content a person or a company's contact details in 3 different styles.
- **Social Link Widget** – this is a type of social widget wherein you can display a list of links to different social networking sites as a content. It offers 3 different styles for you to choose from.

4. Once clicked, you will then be redirected to the options page of the social widget you chose where you can customize it according to your liking. A preview window is also available on the right side so you can see how it looks like once it goes live in your site.

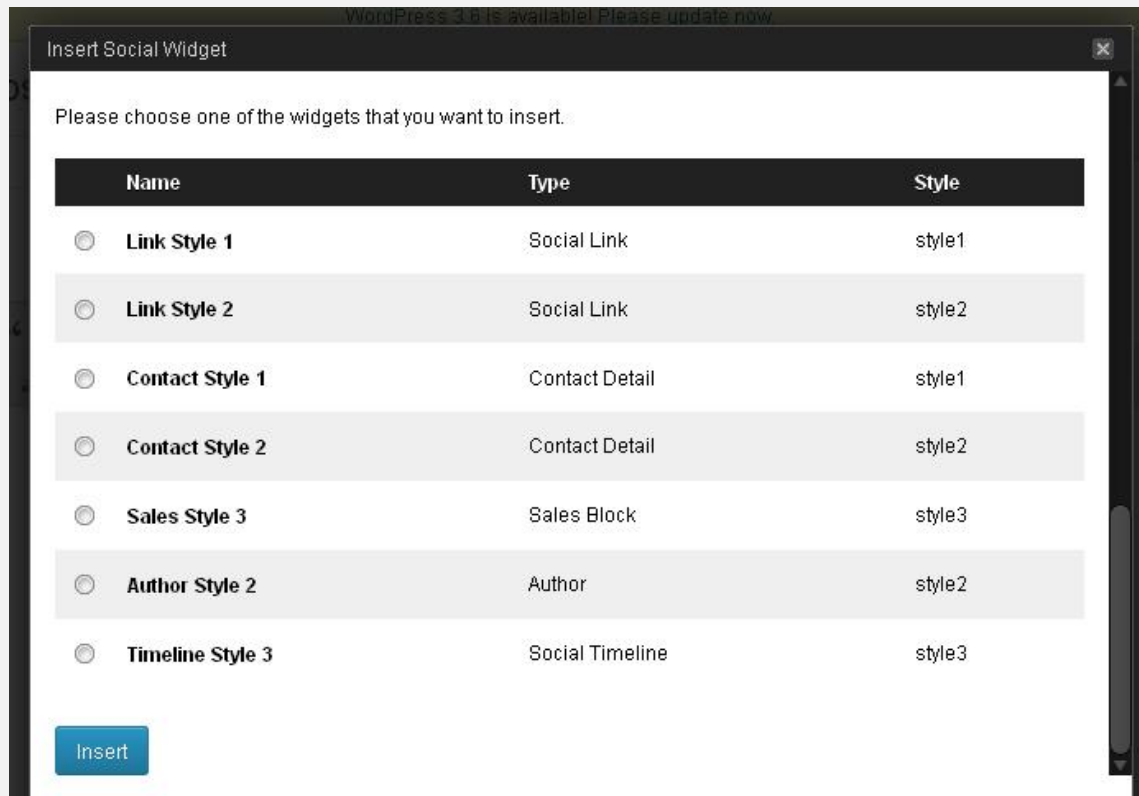

How to Insert WP Social Widget to Posts/Pages

This guide will walk you through on how to insert wp social widget contents in posts and pages.

1. In order to insert wp social widget content to a post or page, click the icon as shown in the screenshot below. The icon is available whether you are using the visual or the html editor mode.

2. This should open a window that lists down your previously created wp social widget contents wherein you would have to select one. Refer to the sample below:

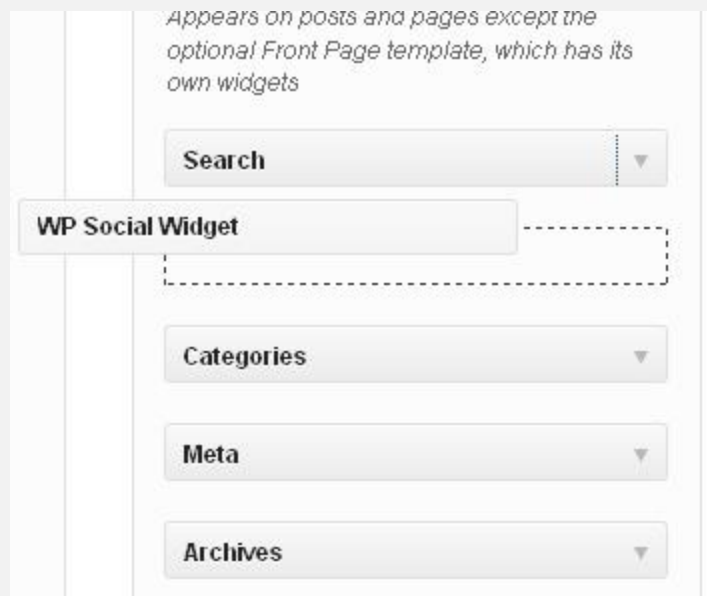

3. Once you have decided which ones you want to get included in the post or page, click insert.

How to Add WP Social Widget to Widgets Area

This guide will walk you through on how to insert wp social widget contents in the widgets area.

1. From the dashboard, navigate to **Appearance -> Widgets** which would then open up the widget management page.
2. Drag the wp social widget tab to the position you want it to display.

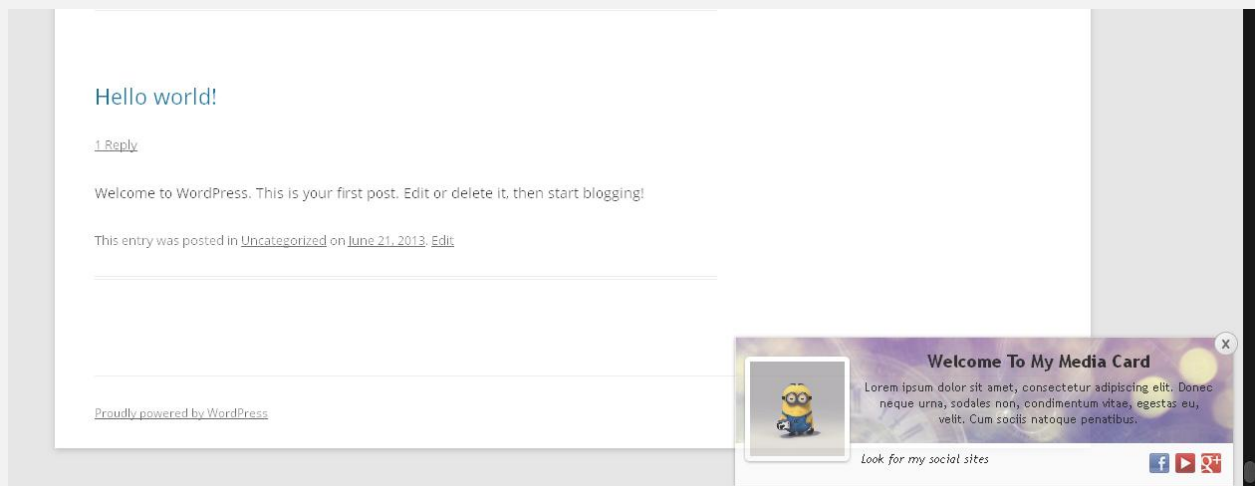

3. Select from the dropdown menu the social widget content you want to display from the list of previously created contents.

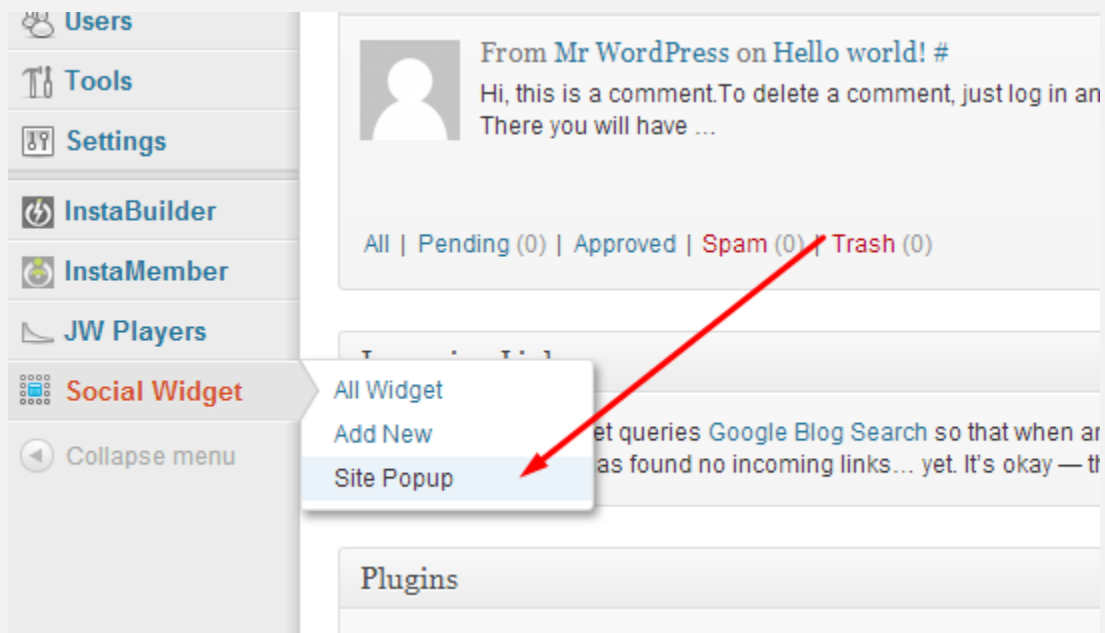

4. Click **Save** to update the changes made.

How to Add WP Social Widget as a Site Popup

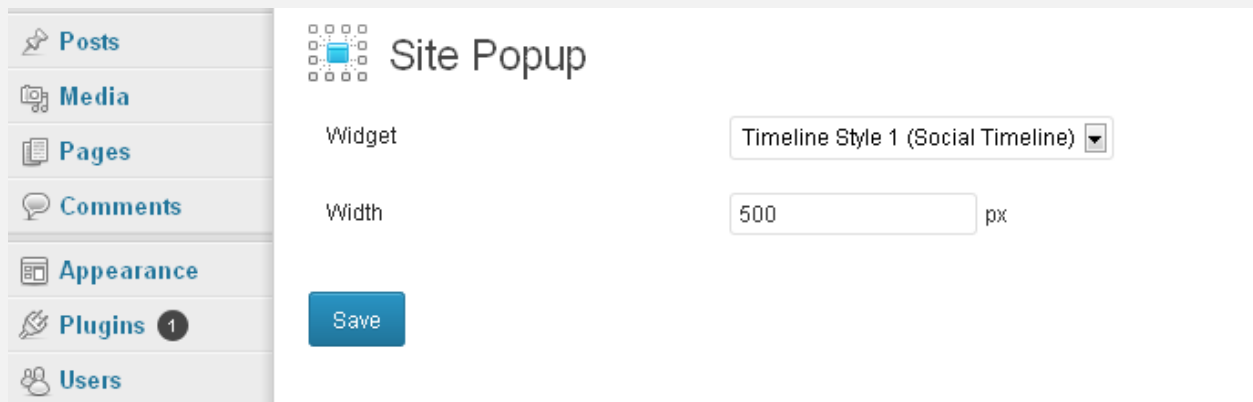

Other than the option to add the previously created social widget contents to posts, pages and widgets, you may as well display them as a site popup. This guide walks you through on how to do this.

1. Hover your cursor over the **Social Widget** menu in the dashboard and click site popup.

2. This should open up the site popup options page similar to the image below.

The screenshot shows the WordPress dashboard's 'Site Popup' configuration page. On the left is a sidebar menu with options: Posts, Media, Pages, Comments, Appearance, Plugins (with a '1' badge), and Users. The main content area is titled 'Site Popup' and contains two settings: 'Widget' set to 'Timeline Style 1 (Social Timeline)' and 'Width' set to '500' pixels. A blue 'Save' button is located at the bottom of the settings area.
