

Finally, Learn How to Boost Your SEO Rank and Generate Targeted Traffic Using This PDF Backlinking Strategy... Starting Today!

This 9-part video course is designed to show you how you can quickly and easily get high authority backlinks that search engines absolutely love.

Dear Business Owner,

One of the dismal realities is that many backlinks no longer work when it comes to SEO. Nowadays, you can't just send a bunch of backlinks in hopes that your website will rank higher.

But there is still hope.

While many different types of backlinks no longer really give you the search engine ranking that you need, there are still some great backlinking strategies well worth your time.

The goal is to create quality content backlinks.

How do you do this? Well, one way is by using PDF files.

That's right - you can use PDF files to get high authority backlinks, but you can actually do a lot more than that.

Don't worry; the specific strategy is not black hat at all. It is completely white hat, so it does take a couple of hours to implement.

Now, implementing this particular strategy will not only get you backlinks that you need, but any prospect that reads your PDF will be pre-sold in advance to help you better convert whatever products and services you are selling.

Introducing PDF Backlink Traffic

Video #1: Introduction and Overview

Before we get started, you're going to get a quick overview of this particular video course and how it is laid out so that you can understand how to implement it faster. We will also cover which tools you're going to need. Keep in mind that in order to create PDF files with hyperlinks that actually work, you will have to invest some money. However, with that said, we will be focusing on tools that don't break the bank. Depending on how advanced you want to go, we will cover two different types of tools.

Video #2: Choose Your Attack Plan

This backlinking strategy is by no means difficult. In fact, once you get the hang of it you can set everything up within less than a couple of hours. You also want a way to convert the traffic before it reaches your website. However, before you can do that you need to figure out what your attack plan is. There are three different attack plans depending on what you are selling that you will learn so that you can successfully convert and presell your traffic before it even reaches your website or the product that you're promoting.

Video #3: Create Content

Once you have gotten your attack plan angle, it's time to create content that will not only educate, but gain your visitors' trust. What we want to do is upon reading the PDF content, and once they click the link to your website or whatever you are trying to promote – we want them to be excited about either your product or taking the necessary action. We will also discuss specific word-processing software that you will need to use to create a fully-working PDF document.

Video #4: Spice it Up

Before we move on, we want to cover how to turn your bland content into something beautiful and visually appealing. There are specific sites that we have tested out, which work extremely well for this specific step.

Video #5: Types of Hyperlinks

Once you have your content in hand, it's time to add some hyperlinks so that when people view your PDF file they are able to click the link and be brought straight to your website or the website you were promoting. In the specific video, we will be talking about different hyperlinks.

Video #6: Things to Gather

Before we complete this process and convert the content to a PDF file we want to gather a few more things, which we will discuss in this particular video.

Video #7: Part 1: Convert to PDF - Basic Conversion

As I stated in the first video, there are two different ways to convert the PDF files. This software can only convert basic hyperlinks such as text hyperlinks.

Video #8: Part 2: Convert to PDF - Hotspot Hyperlinks

If you want to know how to convert images or hotspots, the truth of the matter is that most software is unable to do this. Research revealed that the very expensive software called Adobe Acrobat Pro can do this, but rather than dishing out \$400, I'm going to show you how to do it for much, much cheaper.

Video #9: Upload and Generate Backlinks

At this point of the video course itself, you will have a PDF file with hyperlinks that link directly to the website that you want to rank and which drives traffic too. Now, the whole purpose of this video course is not just to drive traffic, but to get high authority backlinks to the site you want to rank. I'll show you several sites with high domain authority that will give your website the boost it needs. Keep in mind that this is a long-term strategy, with absolutely no black hat involved. That is why although this process does take a little bit of time, it is well worth it in the long term.

Grab this video course now so you can start getting high quality PDF Backlinks from high authority sites to boost your SEO ranking!
